Weekly Zika Virus Testing in Mosquitoes by Region^

Updated: September 15, 2016

County/City	Total Pools Tested	Total Mosquitoes Tested	Zika Positive Pools	Mosquito Species Tested
Alexandria	131	4,011	0	*Aedes albopictus*
Chesapeake	69	2,673	0	*Aedes albopictus*
Chesterfield Co.	17	742	0	*Aedes albopictus*
Fairfax Co.	371	9,848	0	*Aedes albopictus*
Hampton	45	1,480	0	*Aedes albopictus*
Hanover Co.	2	58	0	*Aedes albopictus*
Henrico Co.	96	4,084	0	*Aedes albopictus*
Newport News	38	1,512	0	*Aedes albopictus*
Norfolk	83	3,323	0	*Aedes albopictus*
Northampton Co.	1	25	0	*Aedes albopictus*
Orange Co.	2	66	0	*Aedes albopictus*
Portsmouth	19	745	0	*Aedes albopictus*
Prince William Co.	7	184	0	*Aedes albopictus*
	2	68	0	*Culex salinarius*
Richmond City	27	1,163	0	*Aedes albopictus*
Suffolk	81	3,929	0	*Aedes albopictus*
Virginia Beach	72	2,521	0	*Aedes albopictus*
York Co.	29	892	0	*Aedes albopictus*
Total *Ae. albopictus* tested	**1090**	**37,256**	**0**	
Other Mosquito Species (*Cx. salinarius* *) Tested	**2**	**68**	**0**	

* Note: Cx. salinarius has never been associated with Zika virus transmission

^This data represents mosquito pool testing that is conducted by three different laboratories including Virginia's Division of Consolidated Laboratory Services (DCLS), the Fairfax County Health Department's Public Health Laboratory, and a laboratory at George Mason University. These tested mosquito pools were collected as part of mosquito surveillance efforts at sites throughout the state either by local mosquito control programs, or by the Virginia Department of Health mosquito surveillance personnel. These results do not represent statewide mosquito surveillance efforts, and are only representative of mosquito activity detected at the surveyed sites. The Division of Environmental Epidemiology (DEE) compiles data received from its partners weekly and produces the following weekly report.
