Outpatient COVID-19 Plasma Research Study for Prevention (CSSC-001)

JOHNS HOPKINS MEDICINE

Approved August 5, 2020

Principal Investigator: Shmuel Shoham, MD
Protocol Number: IRB00245634
Clinicaltrials.gov NCT04323800

Have You Been Exposed to COVID-19, But Do Not Have Symptoms?

Join us in our fight against COVID-19.

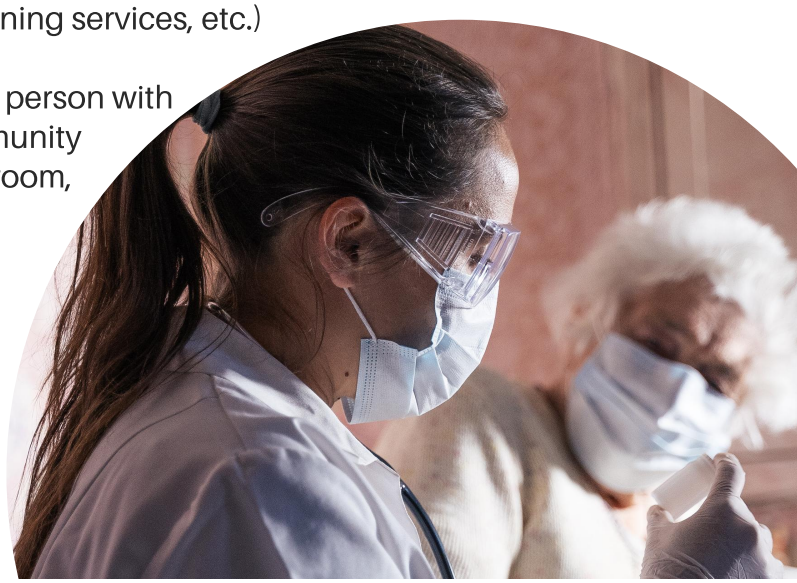
This study will test whether an infusion of plasma containing antibodies from persons who have recovered from COVID-19 can prevent others from getting it.

Can I join?

If you are 18 or older and at high risk of exposure to COVID-19, you may be able to join the study.

You are at high risk if you either:

- work in a hospital (clinical staff, dining services, etc.)
  OR
- have been in close contact with a person with COVID-19 at home or in the community (meeting room, workspace, classroom, travel, etc.)



What's Involved?

- One plasma infusion
- Up to 7 study visits*
- Medical history
- Physical exam
- Blood tests

*You may be compensated up to $200 for study participation
