GMP # 14

TO: District Directors
Environmental Health Managers
Environmental Health Project Managers

FROM: Gary L. Hagy, Assistant Director
Division of Onsite Sewage and Water

Subject: Non-Licensed Well Drillers - Enforcement

Attached is a memorandum and related material regarding the licensing requirements for water well drillers. Section 54.1-1100 of the Code of Virginia requires that all water well drillers practicing in Virginia hold a valid and appropriate contractors license issued by the Board for Contractors. The Board for Contractors requests our assistance in enforcing this requirement. Please implement the steps outlined in the memorandum immediately.

Please make copies of this GMP (including the attached material) and distribute to all Environmental Health Specialists who enforce the Private Well Regulations. A copy should also be placed in the office's GMP Manual.

I believe the attached is self explanatory. However, if you have any questions please call me at (804) 786-1750.

pc: Florence R. Brassier
Division of Onsite Sewage and Water Services Staff
