Re: Notification of EZflow Synthetic Aggregate Color Change

Dear Dr. Degen,

By way of this letter, EZflow LP, a wholly owned subsidiary of Infiltrator Systems Inc. ("Infiltrator") is informing the Department of its plan to produce EZflow products without blue colorant in the expanded polystyrene synthetic aggregate. Synthetic aggregate produced without blue colorant will appear light grey. The pipe, net, and fabric used to manufacture the EZflow product line will remain unchanged in conjunction with the color transition.

If you have any questions or concerns, please contact me at (860) 577-7198. Thank you in advance for your time and consideration.

Sincerely,

A handwritten signature in black ink that reads "David Lentz".

David Lentz, P.E.
Regulatory Director
