

Medical Interpreter Collaborative Network (MICN)

The MICN is being created to bring together the best in the field of Medical Interpretation, identify needs, build partnerships and share resources.

MICN Goals:

- Facilitate Informational Meetings
- Facilitate Collaborative Partnerships
- Identify Community Health Care Providers
- Assess and Evaluate Provider, Interpreter and Patient Needs
- Listen and Respond to Issues Facing Diverse Communities Statewide

How Will Goals Be Accomplished?

The MICN team will canvas the state, reaching out to community partners to identify interpretation needs, resources and barriers. Also, they will set up regional meetings to determine individual and community interest in creating a medical interpretation network.
