Homeless Incentive and Prevention
Program
(HIP)

Paul Regan, PHA
HIP Program Manager

2013 TB/Refugee Nurse Training

Areas of Assistance

- Food
- Rent/Mortgage
- Drug Co-pay
- Special Assistance
- Motel

Food

- Approvals are granted for one calendar month
 - Must meet certain criteria (See HIP Manual)
 - Isolation is not necessary
- Max is \$150.00
- Checks must be made to a HCW
 - Never made to a patient
- Funds must be used for consumable food
 - Food receipts should be retained in the patient's chart and are necessary for further approvals
 - Do not fax food receipts to TB Control

Special Assistance

- Approvals are considered on a case by case basis
 - Must contribute to compliance, medical management, or benefit both the patient and the program
- Approvals are subject to availability of funds
- Checks may be made to anyone
- Receipts
 - Must be retained in the chart
 - Must be faxed to TB Control

Rent/Mortgage

- Approvals are granted for one calendar month
 - Must meet certain criteria (See HIP Manual)
 - Isolation is necessary
- There is no maximum amount
 - Subject to available funds
 - May only approve partial payment
- Checks must be made to a Landlord/Mortgage Co.
- No receipts or rental agreements are necessary
 - Lease agreement or Mortgage should be reviewed at the local level and documented in the chart prior to making a request

Drug Co-Pay to the Patient

- Approvals are not limited except
 - Must be a patient
- Reimbursements are based on co-pay amount or per pill price set by state pharmacy
 - Whichever is lower (Usually only an issue w/INH)
- Checks may be made to the patient
- Receipts must be **faxed** to TB Control
 - Must show total amount paid
 - Must show number of pills purchased
 - Must show date prescription was obtained

Motel

- Approvals are considered on a case by case basis
 - Must meet all criteria including isolation (See HIP Manual)
 - Price and process should be negotiated at local level with motel manager
 - HIP Program manager and motel manager must agree on price and process
- Motel must provide invoices to VDH for payment
 - Mail or fax invoices to HIP Program manager
 - VDH will not give a credit card number to be retained by motel
- Direct Bill may be available
 - Set up through VDH fiscal Dept. and motel
 - Invoices get routed through TB Control

Questions?

Resources and Assistance for District Programs Other Items

Jane Moore, RN MHSA
Director, TB Control & Newcomer Health

Shortages

- PPD Solution
 - National shortage continues
 - Situation improving – restrictions may be revised soon
 - Current adjustments to current usage
 - Cases/suspects – use IGRA
 - Contacts – PPD unless IGRA used first round
 - **ALL OTHERS** for any other purpose – Screening or IGRA
 - Limited TB Control support for T-Spot payment

Shortages

- INH
 - Supplies adequate for needs at current time
 - Return to normal usage of INH for 9 months for treatment of LTBI
- Rifapentine still available for 12 week treatment
 - Free rifapentine likely to end by 12/31/13
 - Anyone who starts free rifapentine will be guaranteed completion with free rifapentine

Shortages

- Other TB drugs
 - No issues currently with other first line drugs
 - Shortages of second line drugs remain problematic

Second Line TB Drugs

- TB Control has funding to pay for second line TB drugs
 - Nurse case manager calls TB control to request assistance
 - Drug resistance
 - Unable to take first line due to side effects or toxicity
 - TB Control notifies Pharmacy and district of authorization
 - TB Control and not district billed for meds
 - Patient should not receive a bill
 - Fairfax process slightly different

Drug Co-Pays to the District

- Districts may be able to be reimbursed for the patient portion of charges for TB meds
 - If “A” patient – no reimbursement possible
 - If “B” patient – district responsible for 90%, TB Control can pay 10% - the patient portion
- Requires completed financial eligibility
- Call Debbie Staley for process and requirements
 - 804-864-7972

Serum Drug Levels

- Serum drug levels recommended for all newly diagnosed cases with diabetes
 - 1st several weeks of treatment
 - INH and rifampin only
- Available for slow responders
 - If still smear positive by 6-8 weeks, nurse case manager should **call TB Control!**
- Labor intensive process
 - Attention to details important!
