

Snapper Snippet #4 – Foreign Language Resources

We are aware that everyone is looking for educational materials in various foreign languages. During our search, we found a variety of translated tuberculosis educational material, including 3HP, on the Minnesota Department of Health website. Please feel free to use their material while we move towards procuring VDH specific TB material. The Minnesota Department of Health has approved slight edits that will need to be made (Changing Minnesota Department of Health to Virginia department of Health for example, be sure to acknowledge the Minnesota Department of Health as the creator of the document). Please call me for assistance if needed.
