

A program of the City of Richmond in partnership with project:HOMES and Richmond City Health District (RCHD).

Lead-based paint and lead-contaminated dust in older buildings are the most common sources of lead poisoning in children. Lead poisoning can cause serious mental and physical developmental problems, damage to the nervous system and organs. Young children should be tested by a physician for lead-poisoning.

City of Richmond –RVA Lead-Based Paint Hazard Control Program

Is offering assistance to control lead-based paint hazards from your home!

To APPLY or ask questions: Call RCHD at (804) 205-3727

HealthyHomesRCHD.com
