Waterworks Regulations Chapter 590 (12VAC5-590)
 Last Amended: Oct. 10, 2014

Section	Section Title	Page
PART I Provisions for the Waterworks Regulations		
Definitions		
10	Definitions	1
20	Authority for regulations	12
30	Purpose of regulations	12
40	Administration of regulations	12
50	Application of regulations to waterworks and water supplies in operation or planned prior to the effective date of the regulations.	13
Procedures		
60	Compliance with the Administrative Process Act	14
70	Powers and procedures	14
80	Procedure	15
90	[Reserved]	15
100	Exception; emergency regulations	15
110	Enforcement	15
120	Emergency Orders	16
125	Chronically noncompliant waterworks	16
130	Suspension of the regulations	17
140	Variances	17
150	Exemptions	21
160	Types of hearings	24
170	Request for hearing	25
180	Hearing as a matter of right	25
190	Permits	25
200	Procedure for obtaining a construction permit	26
210	Formal requirements for the submission of engineering data	30
220	Compliance with Manual of Practice	30
230	Issuance of the construction permit	31
240	Revisions of approved plans	31
250	Statement required upon completion of construction	31
260	Issuance of the operation permit	31
270	Inspection and correction	32
280	Procedure for obtaining a construction permit for well sources	32
290	Procedure for issuance of special permits for new or nonconventional methods, processes, and equipment	33
300	Procedure for obtaining a general permit for distribution mains	34
310	Amendment or reissuance of permits	35
320	Revocation or suspension of a permit	35
330	Monitoring, records, and reporting	35

Section	Section Title	Page
PART II Operation Regulations for Waterworks		
General		
340	General	36
350	Sanitary surveys	36
360	Responsibility; owner	37
General Information		
370	Sampling frequency	37
375	Lead and copper monitoring	75
379	Groundwater system monitoring	90
380	Bacteriological quality	92
385	Lead and copper action level compliance	96
390	Chemical and physical quality	97
400	Radiological Quality	97
405	Lead and copper treatment techniques	98
410	Determination of compliance	112
420	Treatment technique requirement	118
421	Groundwater system treatment techniques	147
425	Raw water monitoring requirements for groundwater sources	149
430	Determination of surface water influence of groundwater sources	150
440	Analytical methods	151
Operation of Waterworks		
450	General	157
460	Personnel	157
470	Waterworks appearance	158
480	Analytical laboratory control	159
490	Adequate treatment	160
500	Disinfection by chlorination	160
505	Emergency management plan for extended power outages	162
510	Acceptable operating practices	162
520	Waterworks expansion	163
530	Reporting	163
540	Public notices	178
545	Consumer confidence reports	186
550	Recordkeeping	194
560	Safety	196
570	Operational report forms	196
Cross Connection Control and Backflow Prevention in Waterworks		
580	General	197
590	Cross connections	197
600	Responsibilities	197
610	Containment policy	198
620	Type of protection required	200
630	Backflow prevention devices	200

Section	Section Title	Page
PART III Manual of Practice for Waterworks Design		
General		
640	General	201
650	Objectives of a waterworks	202
660	Site location	202
670	Site size	202
680	Treatment process selection	202
690	Capacity of waterworks	203
700	Metering total water production	204
710	Site layout	204
720	Building layout	205
730	Standby power capability	206
740	Maintenance and servicing of equipment	206
750	Shop space and storage	206
760	Laboratory	206
770	Sample taps	207
780	Wall Castings	207
790	Water supply service	207
800	Disinfection	207
810	Paints, coatings, sealers, or liners	208
Source Development		
820	General	208
830	Surface water sources; quantity; quality; development structures	209
840	Groundwater sources	210
Processes and Devices		
850	General	216
860	Chemical application	216
870	Mixing and sedimentation	222
880	Filtration	226
890	High rate treatment processes	234
900	Softening	236
910	Aeration	238
920	Iron and manganese control	239
930	Fluoridation	240
940	Fluoride removal	241
950	Stabilization	242
960	Taste and odor control	243
970	Removal of volatile synthetic organic chemicals (VOCs)	244
980	Microscreening	245
990	Waterworks waste	245
1000	Disinfection	246
Pumping Facilities		
1010	General	249
1020	Location	249
1030	Groundwater facilities	249

Section	Section Title	Page
1040	Pump stations	251
1050	Booster pumps	252
1060	Automatic and remote controlled stations	253
1070	Appurtenances	253
Finished Water Storage Structures		
1080	General	254
1090	Plant storage	257
1100	Distribution storage	258
Water Distribution Systems		
1110	Materials	258
1120	Minimum pipe size	259
1130	System design	259
1140	Installation of water mains	259
1150	Separation of water mains and sewers	260
1160	Valve, air relief, meter, and blowoff chambers	261
1170	Hydrants	261
1180	Surface water crossings	261
1190	Water services and plumbing	262
1200	Water pressure in systems	262
1210	Disinfection of water mains	262
1220	Cover	263
1230	Metering	263
Part IV Exceptions for Noncommunity Waterworks to Specific Sections of the Manual of Practice (Part III)		
1240	General	264
1250	Exceptions to Article 1 of Part III	264
1260	Exceptions to Article 2 of Part III	264
1270	Exceptions to Article 5 of Part III	264
1280	Exceptions to Article 6 of Part III	265
Appendix A	Reserved	265
Appendix B	Background used in developing the chemical, physical and radiological drinking water standards.	265
Appendix C	Field office counties and cities served	268
Appendix D	(Reserved)	269
Appendix E	(Reserved)	269
Appendix F	(Reserved)	269
Appendix G	Monitoring and reporting	269
Appendix H	(Repealed)	277
Appendix I	Suggested outline of contents of a cross connection control program	277
Appendix J	Bacteriological sampling siting report	278
Appendix K	Coliform violation determination	279
Appendix L	Determination of CT	280
Appendix M	Lead and copper	298
Appendix N	BATs for inorganic compounds and organic chemicals	303
Appendix O	Regulated contaminants for consumer confidence reports and public notification	306
Appendix P	Best available technologies for radionuclides	320
