* Data reported includes cases filed from the start of the data collection system in November 2017.

† Sex is reported as unknown here if the clinician filing the case report omitted a response to this field in the data collection form.

‡ More than one option may have been selected, so totals may sum to >100% of overall case total.

Note: Cases in system where reporter indicated that there were no signs or symptoms of withdrawal were omitted from this case report, as they do not meet the standard case definition in use.
