Regarding: VDH evaluation of the Infiltrator IM-540 tank

Dear Mr. Bachelder:

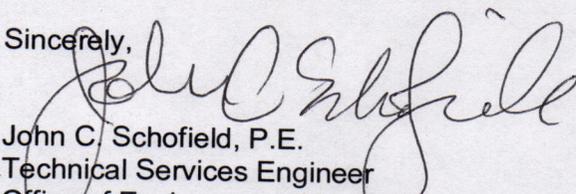

This office reviewed the technical information supplied for the IM-540 tank and the May 2013 technical bulletin "Infiltrator IM- and TW-Series Tank Buoyancy Control Guidance". The tank does substantially comply with the structural requirements of the Virginia *Sewage Handling and Disposal Regulations* dated July 2000.

Designers are responsible for complying with the specific regulatory requirements for dosing and holding tanks as applicable to their site-specific designs.

This letter does not constitute an endorsement for the use of this product but merely an acknowledgement of its suitability for use as a holding tank or a pump tank.

If you require anything further please contact me by phone at 540 463 1642.

Sincerely,

John C. Schofield, P.E.
Technical Services Engineer
