Trauma in Virginia
Designated Trauma Centers

There are 14 designated trauma centers in Virginia, of which, at the completion of this report, 13 were submitting data to the Virginia Statewide Trauma Registry. A trauma center’s designation is defined by the following criteria:

Level I
Level I trauma centers have an organized trauma response and are required to provide total care for every aspect of injury, from prevention through rehabilitation. These facilities must have adequate depth of resources and personnel with the capability of providing leadership, education, research and system planning.

Level II
Level II trauma centers have an organized trauma response and are also expected to provide initial definitive care, regardless of the severity of injury. The specialty requirements may be fulfilled by on call staff, that are promptly available to the patient. Due to some limited resources, Level II centers may have to transfer more complex injuries to a Level I center. Level II centers should also take on responsibility for education and system leadership within their region.

Level III
Level III centers, through an organized trauma response, can provide prompt assessment, resuscitation, stabilization, emergency operations and also arrange for the transfer of the patient to a facility that can provide definitive trauma care. Level III centers should also take on responsibility for education and system leadership within their region.

Level I Trauma Centers
- Carilion Roanoke Memorial Hospital
  Bellevue @ Jefferson Streets, Roanoke
