§ 32.1-111.3. Statewide emergency medical care system.

A. The Board of Health shall develop a comprehensive, coordinated, emergency medical care system in the Commonwealth and prepare a Statewide Emergency Medical Services Plan which shall incorporate, but not be limited to, the plans prepared by the regional emergency medical services councils. The Board shall review the Plan triennially and make such revisions as may be necessary. The objectives of such Plan and the system shall include, but not be limited to, the following:

1. Establishing a comprehensive statewide emergency medical care system, incorporating facilities, transportation, manpower, communications, and other components as integral parts of a unified system that will serve to improve the delivery of emergency medical services and thereby decrease morbidity, hospitalization, disability, and mortality;

2. Reducing the time period between the identification of an acutely ill or injured patient and the definitive treatment;

3. Increasing the accessibility of high quality emergency medical services to all citizens of Virginia;

4. Promoting continuing improvement in system components including ground, water and air transportation, communications, hospital emergency departments and other emergency medical care facilities, consumer health information and education, and health manpower and manpower training;

5. Improving the quality of emergency medical care delivered on site, in transit, in hospital emergency departments and within the hospital environment;

6. Working with medical societies, hospitals, and other public and private agencies in developing approaches whereby the many persons who are presently using the existing emergency department for routine, non urgent, primary medical care will be served more appropriately and economically;

7. Conducting, promoting, and encouraging programs of education and training designed to upgrade the knowledge and skills of health manpower involved in emergency medical services;

8. Consulting with and reviewing, with agencies and organizations, the development of applications to governmental or other sources for grants or other funding to support emergency medical services programs;

9. Establishing a statewide air medical evacuation system which shall be developed by the Department of Health in coordination with the Department of State Police and other appropriate state agencies;

10. Establishing and maintaining a process for designation of appropriate hospitals as trauma centers and specialty care centers based on an applicable national evaluation system;

11. Establishing a comprehensive emergency medical services patient care data collection and evaluation system pursuant to Article 3.1 (§ 32.1-116.1 et seq.) of this chapter;

12. Collecting data and information and preparing reports for the sole purpose of the designation and verification of trauma centers and other specialty care centers pursuant to this section. All data and information collected shall remain confidential and shall be exempt from the provisions of the Virginia Freedom of Information Act (§ 2.2-3700 et seq.); and

13. Establishing a registration program for automated external defibrillators, pursuant to § 32.1-111.14:1.

B. The Board of Health shall also develop and maintain as a component of the Emergency Medical Services Plan a statewide prehospital and interhospital Trauma Triage Plan designed to promote rapid access for pediatric and adult trauma patients to appropriate, organized trauma care through the publication and regular
updating of information on resources for trauma care and generally accepted criteria for trauma triage and
appropriate transfer. The Trauma Triage Plan shall include:

1. A strategy for implementing the statewide Trauma Triage Plan through formal regional trauma triage plans
developed by the regional emergency medical services councils which can incorporate each region's geographic
variations and trauma care capabilities and resources, including hospitals designated as trauma centers pursuant
to subsection A of this section. The regional trauma triage plans shall be implemented by July 1, 1999, upon the
approval of the Commissioner.

2. A uniform set of proposed criteria for prehospital and inter hospital triage and transport of trauma patients,
consistent with the trauma protocols of the American College of Surgeons' Committee on Trauma, developed
by the Emergency Medical Services Advisory Board, in consultation with the Virginia Chapter of the American
College of Surgeons, the Virginia College of Emergency Physicians, the Virginia Hospital and Healthcare
Association, and prehospital care providers. The Emergency Medical Services Advisory Board may revise such
criteria from time to time to incorporate accepted changes in medical practice or to respond to needs indicated
by analyses of data on patient outcomes. Such criteria shall be used as a guide and resource for health care
providers and are not intended to establish, in and of themselves, standards of care or to abrogate the
requirements of §8.01-581.20. A decision by a health care provider to deviate from the criteria shall not
constitute negligence per se.

3. A program for monitoring the quality of care, consistent with other components of the Emergency Medical
Services Plan. The program shall provide for collection and analysis of data on emergency medical and trauma
services from existing validated sources, including but not limited to the emergency medical services patient
care information system, pursuant to Article 3.1 (§32.1-116.1 et seq.) of this chapter, the Patient Level Data
System, and mortality data. The Emergency Medical Services Advisory Board shall review and analyze such
data on a quarterly basis and report its findings to the Commissioner. The first such report shall be for the
quarter beginning on July 1, 1999. The Advisory Board may execute these duties through a committee
composed of persons having expertise in critical care issues and representatives of emergency medical services
providers. The program for monitoring and reporting the results of emergency medical and trauma services data
analysis shall be the sole means of encouraging and promoting compliance with the trauma triage criteria.

The Commissioner shall report aggregate findings of the analysis annually to each regional emergency medical
services council, with the first such report representing data submitted for the quarter beginning July 1, 1999,
through the quarter ending June 30, 2000. The report shall be available to the public and shall identify,
minimally, as defined in the statewide plan, the frequency of (i) incorrect triage in comparison to the total
number of trauma patients delivered to a hospital prior to pronouncement of death and (ii) incorrect interfacility
transfer for each region. The Advisory Board shall ensure that each hospital or emergency medical services
director is informed of any incorrect interfacility transfer or triage, as defined in the statewide plan, specific to
the provider and shall give the provider an opportunity to correct any facts on which such determination is
based, if the provider asserts that such facts are inaccurate. The findings of the report shall be used to improve
the Trauma Triage Plan, including triage, and transport and trauma center designation criteria. The
Commissioner shall ensure the confidentiality of patient information, in accordance with §32.1-116.2. Such
data or information in the possession of or transmitted to the Commissioner, the Advisory Board, or any
committee acting on behalf of the Advisory Board, any hospital or prehospital care provider, or any other
person shall be privileged and shall not be disclosed or obtained by legal discovery proceedings, unless a circuit
court, after a hearing and for good cause shown arising from extraordinary circumstances, orders disclosure of
such data.

C. Whenever any state-owned aircraft, vehicle, or other form of conveyance is utilized under the provisions of
this section, an appropriate amount not to exceed the actual costs of operation may be charged by the agency
having administrative control of such aircraft, vehicle or other form of conveyance.
