

January 10, 2017

Multiple private laboratories offer Zika virus diagnostic testing.* These include the following:

- BioReference Laboratories
 - RNA PCR (transcription mediated amplification) test on serum and urine
 - IgM assay on serum
 - Test information [here](#) (search for “Zika”)

- LabCorp
 - Real-time reverse transcription PCR test on serum and urine
 - IgM assay on serum
 - Test information [here](#) (search for “Zika”)

- Mayo Medical Laboratories
 - Real-time reverse transcription PCR test on plasma, serum, urine
 - IgM assay on serum
 - Test information [here](#) (search for “Zika”)

- Solstas Lab Partners
 - Real-time reverse transcription PCR test on plasma, serum, urine
 - IgM assay on serum
 - Test information [here](#) (search for “Zika”)

- Quest Diagnostics
 - Real-time reverse transcription PCR test on serum and urine
 - IgM assay on serum
 - Test information [here](#) (search for “Zika”)

- ViraCor-IBT Laboratories
 - Real-time reverse transcription PCR test on plasma, serum and urine
 - IgM and IgG assays on serum
 - Test information [here](#) (search for “Zika”)

*As of January 10, 2017. FDA maintains a list of all Zika virus Emergency Use Authorizations on their website. Please refer to their website for the current list of the assays and the associated letters of authorization, fact sheets and product labeling. Assay-specific information (e.g., acceptable specimen types, performance characteristics) is included in the labeling. <http://www.fda.gov/MedicalDevices/Safety/EmergencySituations/ucm161496.htm>.
