COMMUNITY-CAMPUS PARTNERSHIPS FOR HEALTH

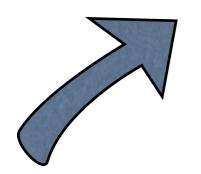

Participatory Policy Analysis: Achieving Systems Level Change Through CBPR

AN EDUCATION AND ACTION COMPANY THAT WORKS EXCLUSIVELY WITH COMMUNITIES AND THIER PARTNERS TO DESIGN AND PROMOTE HEALTHY, EFFICIENT, EQUITABLE POLICIES.

THE CBPR POLICY CHANGE CYCLE

Evaluating Community Issues,

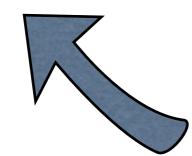

Building Skills& Leadership

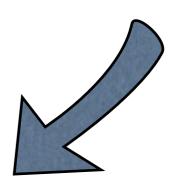

Taking Action,
Affecting Change

Selecting Policy
Alternatives,
Assessing the Political
Environment

Mustering Resources, Choosing Action Plans

THE POLICY LENS

Policy =
A Plan
of Action

Public Policy =
Government's
Plan of Action

POLICY VS. PRACTICE

PUBLIC POLICY

- Tax
- Subsidize\grant\loan
- Tinker with economy
- Fund government
- Service
- Provide Jobs
- Build and maintain infrastructure
- Educate

- Regulate
- Structure rights
- Generate information, keep records, disseminate information
- Reform themselves

THE EIGHTFOLD PATH TO MORE EFFECTIVE PROBLEM SOLVING

- - EUGENE BARDACH

- Define the problem
- Assemble some evidence
- Construct the alternatives
- Select the criteria
- Project the outcomes
- Confront the trade-offs
- Decide!
- Tell your story

DEFINE THE PROBLEM

- What is the problem?
- Why is it a problem?
- Is it a public problem?
- Can it be measured? Has it been measured?
 How can we measure it?
- What do we already know about the problem and our community's relationship to it?
- What are our gaps in knowledge?

GUIDELINES FOR ASSEMBLING EVIDENCE

"The goal [of policy research] is to improve one's understanding of the policy problem, and of possible means of coping with it, to the point where it is possible to advocate a responsible course of action."

- Eugene Bardach

CONSTRUCTING THE ALTERNATIVES

- What are the well-known alternatives?
- What is being done about this problem in other places and times (historical)?
- What alternatives can we invent? What could we do ourselves? What could the community do with government help? What could local organizations and businesses do? What could the government do?
- How would the proposed alternatives change the game (the incentives)?
- What if we do nothing?

SELECT THE CRITERIA TO EVALUATE THE OUTCOMES

- Efficiency: Utilitarianism
- Fairness
- Democracy
- Freedom (from government, of speech, economic)
- Community
- Other evaluative (or normative) criteria

ANALYTICAL CRITERIA

Legality

Political Acceptability

Robustness - Does it lend itself to implementation?

Improvability - Does it lend itself to innovation?

PROJECT THE OUTCOMES

- projection = model + evidence
- Write scenarios consider multiple perspectives and implementation issues
- Think through unintended consequences. How does the alternative shift incentives? How will it affect action?
- Find one depressive realist guard against excessive optimism
- Design a Matrix (x=alternatives, y=criteria)
- Conduct research to answer critical questions

THE BAYVIEW CASE OUTCOMES MATRIX

	Political Feasibility	Fairness	Maximize increase in healthy food
Good Neighbor Resolution	Easy	Fair	Likely little impact
Restricted- use District	Difficult	unfair to new merchants	Increasing impact overtime
Good Neighbor Program	Doable	Favors participants, but voluntary	Immediate small impact

CONFRONT THE TRADE-OFFS

- Simplify Comparisons consolidate similar alternatives.
- What are trade-offs?
 What you give and what you get. Money v. Service,
 Freedom v. Security, Personal sacrifice v. Public good.
- Weighting the Criteria.
- What are the trade-offs from the partnership's perspective?
- What are the trade-offs from the policymaker's or implementer's perspective?

COLLECTIVE DECISION-MAKING

- Good process = good result.
- Partnership has barriers to consensus due to multiple perspectives.
- These multiple perspectives also lead to better analysis and decision-making.
- This is no time to decide how to make decisions!

THE EIGHTFOLD PATH TO MORE EFFECTIVE PROBLEM SOLVING

- EUGENE BARDACH

Define the problem

- Tell your story
- Assemble some evidence
- Construct the alternatives
- Select the criteria
- Project the outcomes
- Confront the trade-offs
- Decide!
