

Zika Virus: Coverage for Prevention

- Zika is spread mostly by the bite of an infected mosquito. These mosquitoes are aggressive daytime biters. They can also bite at night.
- Zika can be passed from a pregnant woman (www.cdc.gov/zika/pregnancy/index.html) to her fetus. Infection during pregnancy can cause certain birth defects.
- There is no vaccine or medicine for Zika.

Prevention

- Wear long-sleeved shirts and long pants.
- Stay in places with air conditioning and window and door screens to keep mosquitoes outside.
- Treat your clothing and gear with permethrin or buy pre-treated items.
- Use Environmental Protection Agency (EPA)-registered insect repellents. Always follow the product label instructions.

Covered Zika Virus Care

- Insect repellent for all members (Prescription is required) 1 bottle per month. See covered products below:

Product Name	Package Size (ML)	NDC
CUTTER BACKW AER 25%	170.000	71121-0962-80
