

DWSRF 2010 Draft Project Priority List
- PRELIMINARY -

To assist waterworks owners in their planning efforts, VDH is releasing a preliminary draft list of the current top 61 priority construction projects in Virginia that are “eligible” for 2010 funding under the federal Drinking Water State Revolving Fund (DWSRF) program. This prioritized list includes all construction projects that scored acute health points, chronic health points, or a minimum of 15 public health points. Please note this list is not final, the projects on this list are not guaranteed funding, and the project order is subject to change in accordance with program guidelines (e.g. subsequent changes in project status).

At this time VDH does not know the amount of 2010 DWSRF funding available but the estimate is between \$8 and \$26 million. VDH will fund projects in priority order (starting at one and moving down the list) until all construction funds are exhausted.

VDH encourages waterworks to pursue other sources of funding in the event their project can not be funded through the DWSRF.
