GMP #40

MEMORANDUM

TO: District Directors
Environmental Health Managers
Environmental Health Supervisors
Environmental Health Specialists

FROM: David Effert, Technical Services Chief
Division of Onsite Sewage and Water Services

SUBJECT: Approval of Norwesco Polyethylene Septic Tanks
Onsite - Product Approval - Septic Tank

The following Norwesco, Inc. polyethylene septic tanks substantially comply with Section 4.16.C.1 through Section 4.19 of the Sewage Handling and Disposal Regulations, and have been approved for use in Virginia:

750 gallon tank, product item number 40018
1000 gallon tank, product item number 40006
1000 gallon tank, product item number 40187*
1250 gallon tank, product item number 40325*
1500 gallon tank, product item number 40276*

*Product item numbers are for the one compartment tank.
The two compartment tanks are also approved.

Please note that the 300 gallon and 500 gallon tanks were not approved for use as septic tanks in Virginia, because the Sewage Handling and Disposal Regulations requires the use of a minimum of a 750 gallon septic tank.

Enclosed is a copy of Norwesco's septic tank product literature, and Norwesco's installation instructions. **The tanks must be installed following the manufacturer's recommendations. The manufacturer states that the tank should not be installed in areas which have water-saturated clay or a high water table. If the site will have a seasonal water which may reach the bottom of the installed tank, the permit should state that a Norwesco tank is unsuitable for installation at this site.**
