RE: TRA Testing

Dear Mr. Peyton:

I am receipt of your email dated May 10, 2010 concerning procedures used in testing B.O.D. and T.S.S. in samples collected from Clearstream aerobic treatment units around Lake Livingston. In discussing this with Mike Knight, TRA Water Quality Supervisor, he advises that all of these type samples were analyzed in accordance with 40 CFR 136.

The samples collected in the field were collected and transported back to the laboratory by Field Personnel and to the best of my knowledge were collected and preserved properly.

Hopefully, this information will be helpful to you. However should you need any additional assistance, please don't hesitate to contact me here at our office at (936) 365-2292.

Sincerely,

A handwritten signature in black ink, appearing to read 'Richard Gerard', written in a cursive style.

Richard Gerard  
Area Administrator  
Lake Livingston Project
