Re: Scale up Review – MicroFast 0.625 Model
NSF Project Number 9091280, J-91771

Dear Jim,

We have completed the review of your request for the approval of the Scaled up MicroFast Model 0.625 wastewater treatment systems. The key elements of the review included:

- Determining whether the Certified Systems will produce similar treatment processes as the originally tested system.
- Determining whether the requirements of NSF/ANSI Standard 40 (2010) and the NSF Certification Policies for Wastewater Treatment Devices will continue to be met.
- Determining whether the requirements of NSF/ANSI Standard 245 (2010) and the NSF Certification Policies for Wastewater Treatment Devices will continue to be met.

Based on this review, NSF can authorize the Bio-Microbics MicroFast 0.625 model for Standard 40 and 245 Certification.

If you have any questions, please feel free to contact me directly.

Sincerely,

A handwritten signature in cursive script that reads 'Sharon Steiner'.
