Simply Natural, Naturally Simple

Thank you for choosing the ECO-PURE 300 SERIES PEAT MOSS FILTER for treating your wastewater. This manual contains information about the use, operation, warranties and maintenance.

OPERATION

The ECO-PURE 300 SERIES PEAT MOSS FILTER consists of a watertight poly tank which holds Enhanced Peat Moss which treats the wastewater from your septic tank to a very high degree before it enters the underlying ground surface.

USING THE PEAT FILTER

The efficiency of the on-site system using the ECO-PURE 300 SERIES PEAT MOSS FILTER depends on common sense.

You should not use the following in your system:

Oil and grease from cooking or machinery, paints or solvents, pesticide products, any toxic substances, any petroleum products or any non-biodegradable substances i.e.: tampons, condoms, sanitary napkins.

THINGS TO REMEMBER

DO NOT cover the ECO-PURE lid, DO NOT drive heavy equipment over the system, DO NOT overload system beyond design limits, DO NOT attempt your own repairs, DO NOT cover any vents, DO NOT plant large trees on system. Always keep system accessible.

MAINTENANCE

Annual maintenance will have to be provided by an authorized service representative during normal business hours by inspecting the FILTER BED and cleaning the septic tank filter to ensure proper functioning, check for ponding or misuse.

If samples are required the owner will pay for all costs involved.

A maintenance record will be forwarded to the HEALTH UNIT and the Owner.

The filter media may have to be replaced every ten years or sooner depending on abuse or higher demand than design limits.

The owner shall maintain a new maintenance agreement every year as long as they own the system.

In the unlikely event of:

- Back-up in you house, your sewer line may be clogged.
- Odors, your house vent may blocked; if not gravity fed, pump may not be functioning.
