

Holly - IP **Kayleigh - IP**

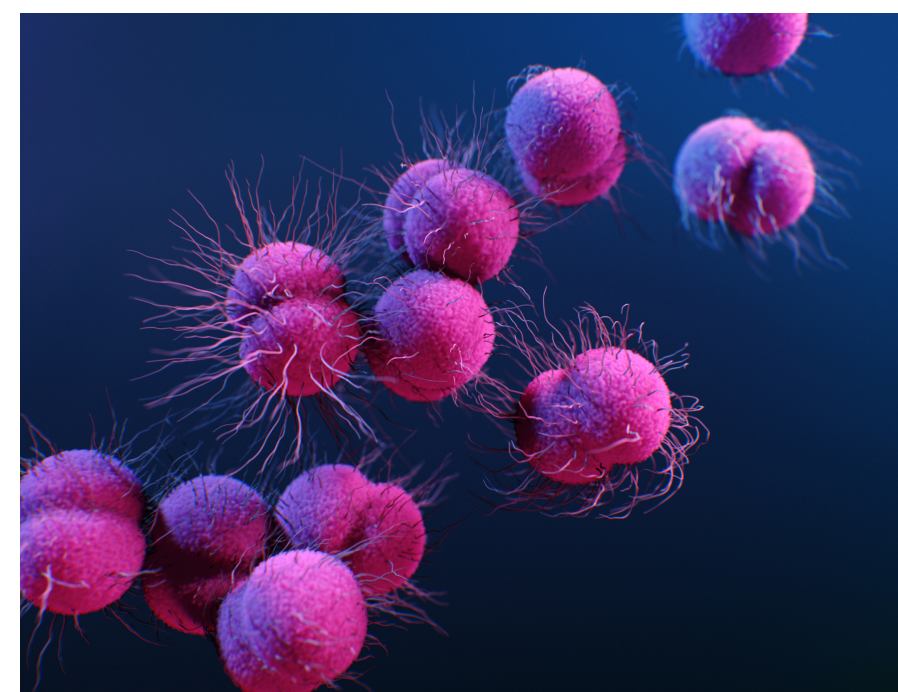

Dr. Cotea
District Epidemiologist
My mentor

Me **Dr. Obasanjo**
District Health Director

Shadowed Infection Preventionists at long-term care facilities for Proactive and Reactive site visits for infection control and education of staff. Utilizing luminometer technology testing for environmental contamination levels and providing personalized action plans for further infection safety standards.

Karina **Sam**
DIS **DIS**

Shadowed Fredericksburg local clinic for STI testing and surveillance with local Disease Infection Specialists.

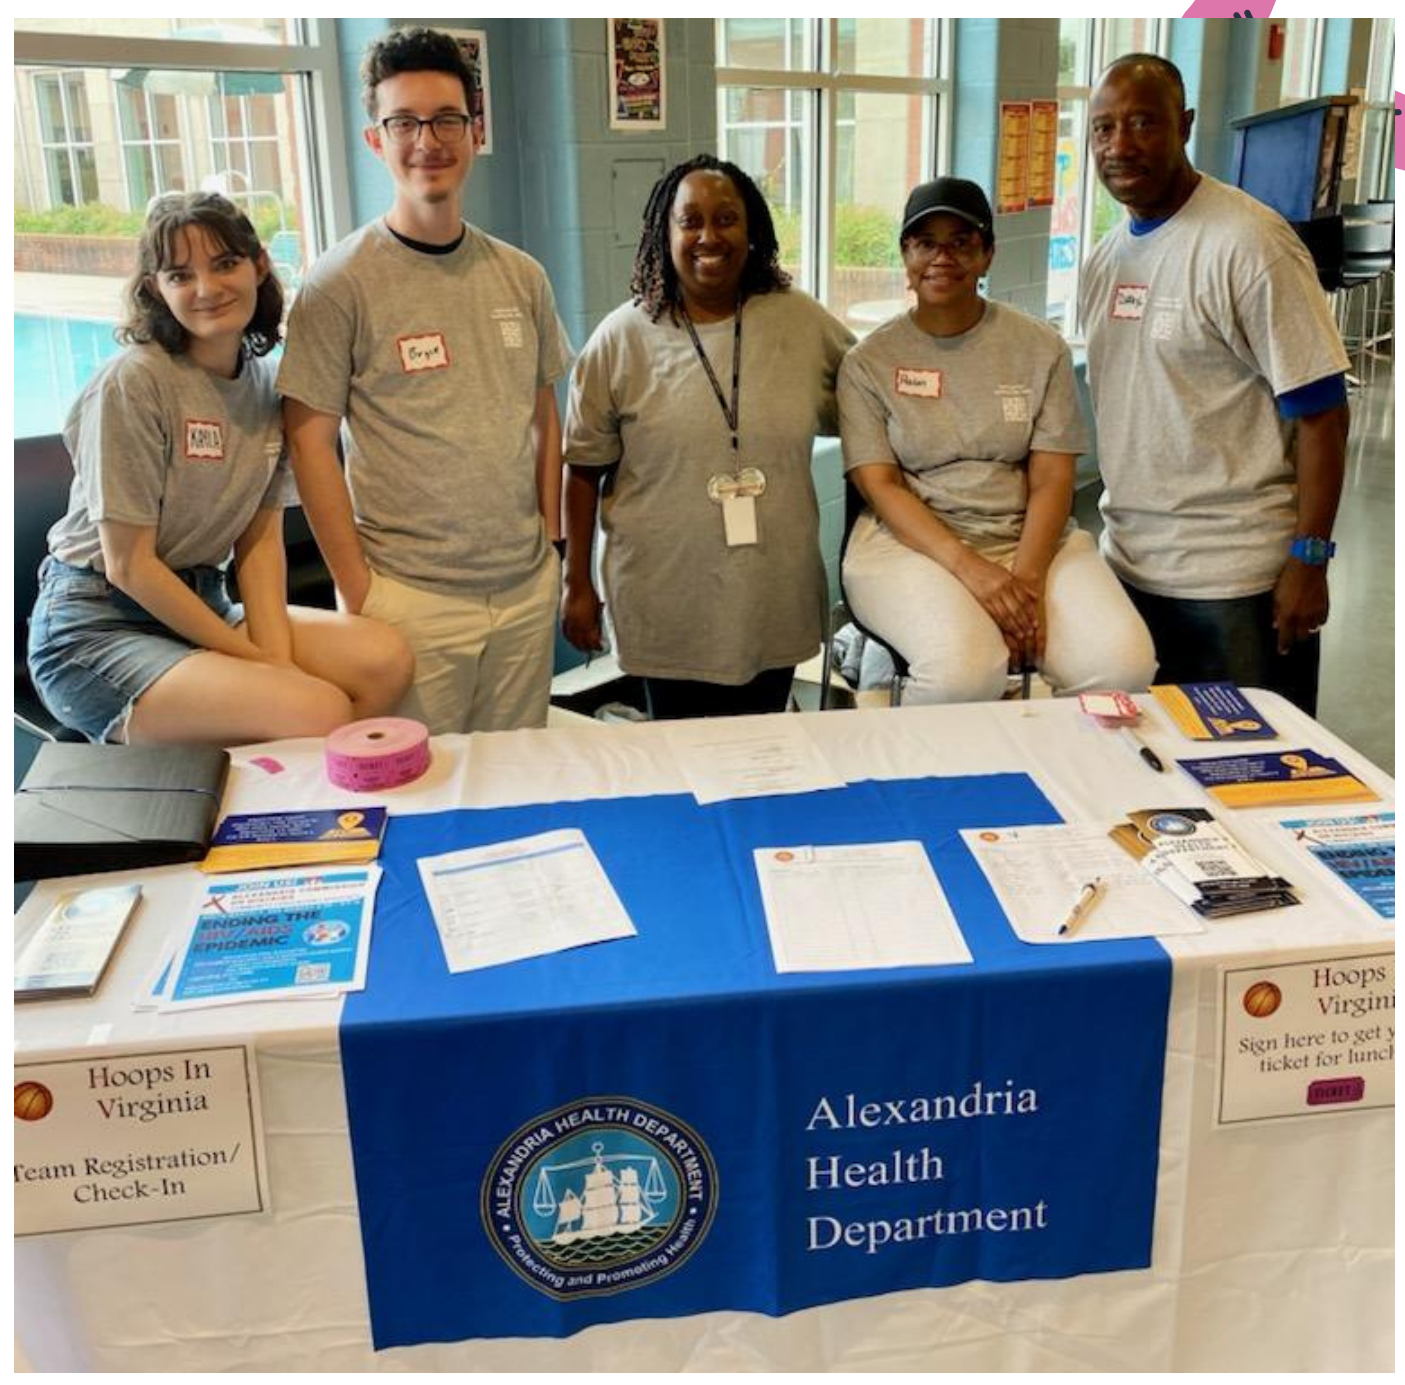

Adult Day Center Infectious Disease Policy Development: Using VDH experiences to run point on developing infectious disease and environmental cleaning policies for safer facilities and disease management.

Created an educational public health campaign on MDRO's for varied audiences in order to create visual awareness for best infection control practices

Wrote a 10 page literature review on the mechanisms of Antimicrobial Resistance, and their rising global concern, and the epidemiological infection prevention measures used by the VDH to slow the spread.

Hoops In Virginia
HIV Testing Day

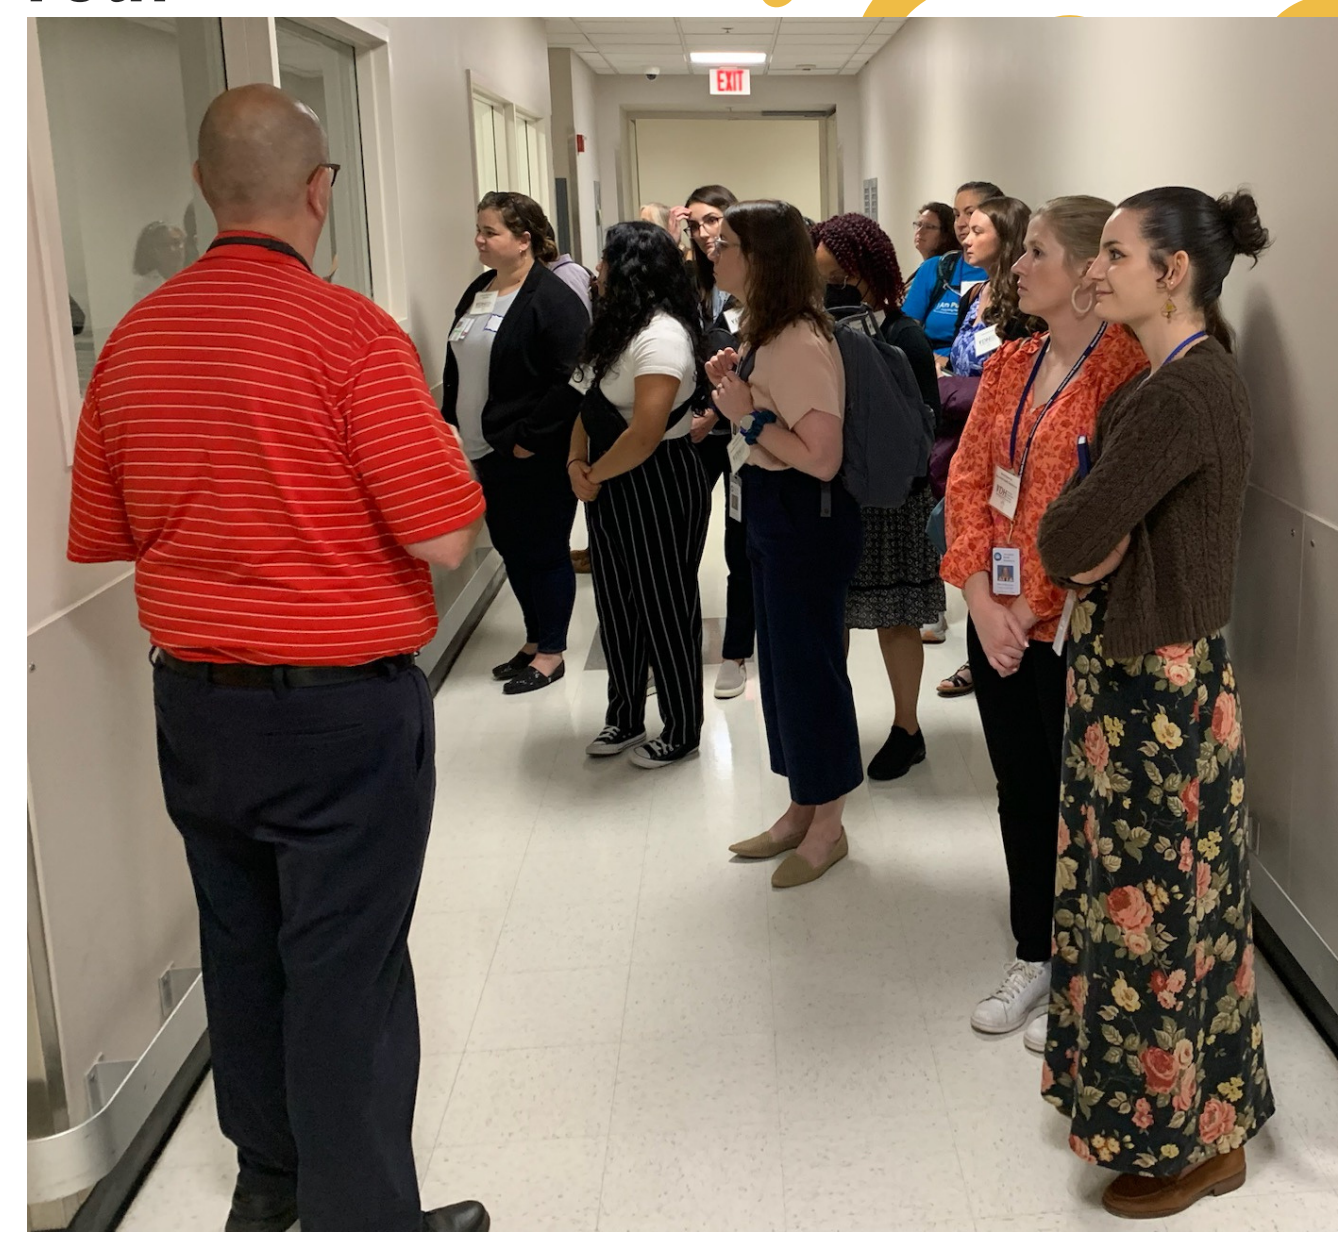

Educating and Serving the community where they are: Aided in educating and providing free HIV testing to the Alexandria community

DCLS Tour

Learning the epidemiological role in surveillance and disease testing with next-generation technology and building partnerships across state agencies.

What I am taking with me:
Love and appreciation for the dedication, passion and tenacity of the VDH. First hand experience in epidemiological infection control and prevention. Long-term partnerships with mentors and colleagues.
