

**Expedited Enrollment Program (EEP) Services have been divided into three categories: Pregnant mothers, Minors, and Recently Incarcerated individuals. Recently Incarcerated individuals are processed into EEP through the Care Coordination program.**

#### **EEP Eligibility for Recently Released from Incarceration Individuals**

The goal of EEP services is to help individuals in high risk populations access their AIDS Drug Assistance Program (ADAP) medication/s to prevent medication interruption upon release. Clients who qualify for EEP do not need to provide a signed Medical Certification Form (MCF), but are required to provide a CD4 count and Viral Load dated within the last 6 months. Clients approved under the EEP are given access to medications through ADAP. In order to continue medication access, clients' will need to provide a physician signed MCF and income documentation during the time of recertification. The Care Coordinator (CC) is responsible for processing all recently released incarcerated clients into the EEP.

To be eligible for EEP applicants must:

1. Live in Virginia
2. Be recently released from incarceration
3. Apply through the Virginia Department of Health either by the Care Coordination discharge summary packet located on the VDH/ADAP webpage or the ADAP application
4. Have an individual or family income at or below 400% of the Federal Poverty Level
5. Have documented HIV diagnosis with CD4 count(s) and Viral Load(s) within the last six months
6. Not qualify or have Medicaid
7. Agree to participate in the service option that applicant/client is eligible for.

When an EEP application is received, Care Coordination office staff will determine which program a client is eligible for based on a review of the application and submitted documentation.
