All data reported to the Virginia Department of Health as of June 2026. Rates for case counts less than 12 are considered unstable and should be interpreted with caution. Rates per 100,000 population. The dark blue bar in the "5-year Trend" graph represents the year with the highest HIV diagnosis rate and the teal bar represents the year with the lowest diagnosis rate.

All data reported to the Virginia Department of Health as of June 2026. Rates for case counts less than 12 are considered unstable and should be interpreted with caution. Rates per 100,000 population. The dark blue bar in the "5-year Trend" graph represents the year with the highest HIV diagnosis rate and the teal bar represents the year with the lowest diagnosis rate.

All data reported to the Virginia Department of Health as of June 2026. Rates for case counts less than 12 are considered unstable and should be interpreted with caution. Rates per 100,000 population. The dark blue bar in the "5-year Trend" graph represents the year with the highest HIV diagnosis rate and the teal bar represents the year with the lowest diagnosis rate.

*All HIV surveillance data reported to the Virginia Department of Health as of June 2026. Living cases based on most recent known address in Virginia, regardless of where diagnosed. Rates for case counts less than 12 are considered unstable and should be interpreted with caution. Rates per 100,000 population.*

**2025**

# VIRGINIA HIV SURVEILLANCE ANNUAL REPORT

**Table 10: Persons with HIV Disease by Health District as of December 31, 2025**

| Health District        | HIV only      |             |              | AIDS          |             |              | Total cases of HIV |             |              |

*All HIV surveillance data reported to the Virginia Department of Health as of June 2026. Living cases based on most recent known address in Virginia, regardless of where diagnosed. Rates for case counts less than 12 are considered unstable and should be interpreted with caution. Rates per 100,000 population.*
