

Your Baby's Hearing Results

Congratulations on the birth of your baby!

The facility where your baby was born conducted a newborn hearing screening.

Your baby **failed with risk** of developing late onset hearing loss.

Since language development begins at birth, it is recommended that:

- Your baby is screened by **one month of age**. If your baby failed more than one screening, **IMMEDIATELY** schedule a diagnostic hearing evaluation with a pediatric audiologist.
- Visit EHDIPALS.org to find a pediatric audiologist or contact Virginia Early Hearing Detection & Intervention at VA_EHDI@vdh.virginia.gov.
- Recommendation for late onset hearing loss: Schedule a diagnostic hearing evaluation with a pediatric audiologist **between ages 12 to 24 months**.

Milestones to Monitor

Birth to 3 months old:

- ▶ Blinks or jumps when there is a sudden, loud sound
- ▶ Quiets or smiles when spoken to
- ▶ Makes sounds like "ooh" or "ahh"

6 to 9 Months Old

- ▶ Turns head toward sounds
- ▶ Understands "no-no" or "bye-bye"
- ▶ Makes babbling sounds ("baba," "mama," "gaga")

3 to 6 Months Old

- ▶ Looks for sound with eyes
- ▶ Recognizes parent's voice
- ▶ Uses many sounds, squeals and chuckles

9 to 12 Months Old

- ▶ Repeats simple words and sounds
- ▶ Correctly uses "mama" or "dada"
- ▶ Responds to singing or music
- ▶ Points to favorite toys and objects when asked
