

Virginia Immunization Information System

Thank you for your interest in the Virginia Immunization Information System – VIIS. The Division of Immunization mission is to reduce morbidity and mortality associated with vaccine – preventable diseases. Utilizing VIIS will contribute greatly to our mission as Virginia pushes forward to increase our vaccine coverage rates and preventing diseases – one immunization at a time.

What is VIIS? In August 2006, the Virginia Department of Health’s Division of Immunization (VDH/DOI) implemented a free web-based immunization registry for public and private sectors statewide. VIIS is a secured, confidential, computerized database which contains vaccine information from participating facilities for individuals of all ages.

Who partners with VIIS? VIIS works with various organization and has participation from private providers, hospitals, free clinics, health plans, pharmacies and more. VIIS is updated daily with immunization data from vital records and local health departments.

Want Access? If you desire to have access to VIIS, there are a couple things to consider...

1. Has your facility previously had access to VIIS? If yes, or if you are not sure, please call our VIIS Help Desk for further assistance at 866-375-9795 to avoid duplicating registrations and VIIS accounts.
2. Is your facility affiliated with a health system? If yes, please call our VIIS Help Desk for further assistance at 866-375-9795.

Getting Access! If your facility has NOT had access to VIIS previously, please refer to steps outlined below. (System requirements include internet access and Adobe Reader.)

- Complete VIIS registration @ <https://apps.vdh.virginia.gov/verip/home.aspx> Click “New to VERIP”. A valid medical license is required for this process (MD, NP, RN, LPN, etc.)
- Registration is reviewed for approval to obtain access.
- Your regional VIIS Field Trainer will contact you to discuss registration and schedule training.
