1-800-828-1120

February 25, 2026

Dear Parents/Guardians of Rising 7th Graders:

As the Virginia State Health Commissioner, students and their health are a priority to me. School vaccinations are a way to keep students healthy now and into their future. This letter provides information about school vaccines for your rising 7th grader.

**The following vaccines are required for children entering 7<sup>th</sup> grade in Virginia:**

- Tdap (Tetanus, Diphtheria, and Pertussis)
- Human Papillomavirus (HPV)
- Meningococcal ACWY (MenACWY)

Please schedule an appointment with a healthcare provider early to beat the rush. During the visit, **talk with your child's healthcare provider about the vaccines your child needs for school.** The HPV vaccine **prevents six types of cancer.** As a parent or guardian, you have the right to decide if your child gets the HPV vaccine. Please review the important information attached to this letter.

If your child **does not have health insurance**, they may be eligible for the Vaccines for Children (VFC) program. You can find a Vaccines for Children (VFC) provider at <https://www.vdh.virginia.gov/immunization/vvfc/locatevvfcprovider/>. These providers can give free vaccines to persons **who qualify and are not able to pay.** If your child **does not have a healthcare provider**, you can contact your local health department at <https://www.vdh.virginia.gov/health-department-locator/>.

Remember to **get a copy of your child's vaccine record to provide to his or her school.** A copy of your child's vaccine record may be available online at <https://myirmobile.com/>.

**Please check with your child's school for other enrollment requirements.** School enrollment information and a checklist are available at [www.vdh.virginia.gov/backtoschool/](http://www.vdh.virginia.gov/backtoschool/).

For more information about school vaccinations in Virginia, please visit <http://www.vdh.virginia.gov/immunization/requirements/>. If you have any questions, please contact Andrea Mendes at (804) 514-2649 or [andrea.mendes@vdh.virginia.gov](mailto:andrea.mendes@vdh.virginia.gov).

Sincerely,

A handwritten signature in black ink, appearing to read "C. Webb".

Dr. Cameron Webb  
State Health Commissioner

# HUMAN PAPILLOMAVIRUS (HPV) VACCINE FACTS

## FACT1: HPV VACCINE PREVENTS CANCER

Prevents  
**6 different**  
types of cancers

**37,000+**  
cancers are caused  
by HPV each year

Healthy diet

Physical activity

Sunscreen

No tobacco

Vaccine

We can help our children reduce their risk of developing cancer in the future by helping them make **healthy choices**. We can also help prevent cancer by getting our children the **HPV vaccine**.

## FACT2: HPV VACCINE IS SAFE AND EFFECTIVE

More than  
**15 years**  
worth of **safety** and  
**effectiveness** monitoring  
that continues today.

**98%**  
**effective** at creating  
immunity to HPV  
types in the vaccine.

More than  
**135 million**  
doses of HPV vaccines  
have been distributed. Data  
continue to show the HPV  
vaccine is **safe** and **effective**.

## FACT3: HPV VACCINE PROVIDES IMMUNITY

The HPV vaccine produces the **strongest immune response** in preteens. To work best, the HPV vaccine should be given in a series of shots between the ages of **11 to 12**, or as early as 9 years old.

## FACT4: HPV VACCINE PROTECTS GIRLS AND BOYS

Since 2006, the percentage of cervical precancers caused by HPV has dropped by **40%** among vaccinated females.

The HPV vaccine can prevent the **80%** of head and neck cancers caused by HPV in males.

## FACT5: HPV VACCINE OFFERS LONG-TERM PROTECTION

People who **received** HPV vaccine remained **protected** from the virus with **no** evidence of the protection decreasing over time.

Where to get the HPV vaccine:

- **Healthcare provider**
- **Local Health Department**
- **Vaccines for Children Provider**

# MENINGOCOCCAL VACCINES FOR PRETEENS AND TEENS

*Meningococcal vaccines help protect against the bacteria that cause meningococcal disease. Meningococcal vaccines are the best way to protect adolescents from getting meningococcal disease*

**The two most common types of illnesses include infections of the:**

Lining of the brain and spinal cord (meningitis)

Bloodstream

**Even with treatment**, about **10 to 15** out of **100** people with meningococcal disease will die from it.

- ✓ All **adolescents** should get **2 doses** of the meningococcal conjugate ACWY (MenACWY) vaccine.
- ✓ They should get the **first** dose at ages **11-12** and a **booster** dose at **16** years old.

DOSE **1**

**Ages 11-12**

*before entering the 7th Grade*

DOSE **2**

**Age 16**

*before entering the 12th Grade*

- 2 doses of **MenACWY** vaccine are **required** for school enrollment/entry.
- 2 doses of **MenB** vaccine are **recommended** after 16 years of age.

SAFE

EFFECTIVE

LONG-LASTING

Please talk with your child's healthcare provider today about getting vaccinated against meningococcal disease.
