

## Completing the Report of Verified Case of Tuberculosis using TB Chart Forms

This document is intended to help collect the data needed for the Report of Verified Case of Tuberculosis (RVCT). An RVCT is completed with all TB cases that will be counted. This document will highlight where each data component on the RVCT can be found within the VDH TB record.

The RVCT data elements are numbered 1 through 49. Please refer to the table below to crosswalk where each RVCT data element can be located in the VDH TB record. For questions about definitions of the RVCT data elements, please contact a member of the [VDH TB Surveillance Team](#) or refer to the [RVCT instruction manual](#).
