Where Can I Get the COVID Vaccine?

By visiting a vaccination event hosted by the Richmond and Henrico Health Districts, a pharmacy, or a primary care provider.

Here's why:

RCHD/HCHD will focus on making the vaccine available free of charge through events in our clinics and priority communities. Many pharmacies and primary care providers will also distribute the vaccine, though they may charge a small fee for the service. Anyone who wants to set up a private testing event should contact a participating pharmacy or other private provider in early 2021 when more doses become available.You can identify local vaccination clinics as they become available by using the CDC's Vaccine Finder tool at vaccinefinder.org.
