

# I got the COVID-19 Vaccine. What now?

Get your second dose. The first dose of the vaccine offers you some protection, but both doses are required for maximum protection.

Watch for mild side effects.

If side effects stick around or get worse, call your doctor.

You are not fully immune until 14 days after your last shot. If you are exposed to COVID-19 before you are fully immune, contact a healthcare provider.

Keep wearing a mask and social distancing until you are fully vaccinated.

Questions? Call the COVID-19 Hotline at (804) 205-3501 or email [RHHDvax@vdh.virginia.gov](mailto:RHHDvax@vdh.virginia.gov)
