Being over 50 increases your risk for severe COVID-19.

The COVID-19 booster can prevent severe disease from COVID-19.

Boosters are safe

Everyone is now eligible for a COVID-19 booster! This additional dose will further increase your protection against severe COVID-19.

Boosters are effective

Data shows adults over 65 years who have received at least two booster shots have the best chance at avoiding hospitalization and in-hospital death due to COVID-19.

Help your loved ones stay up to date on COVID-19 vaccines and boost up today! For more information, visit: **rhhd.gov/vaxevents**.
