MOBILE FOOD ESTABLISHMENT PLAN REVIEW AND APPLICATION PACKET

The Virginia Food Regulations require the submission plans for review and approval prior to: “the construction of, the conversion of, or the remodeling of a Mobile Food establishment to include mobile food establishments of all types (mobile units, pushcarts, and vending trucks)”.

This Mobile Food Establishment Plan Review packet is intended to help you through the plan review process and to assure that your mobile unit or pushcart meets the requirements. This document is a companion to the Mobile Food Establishment guidelines and should be completed as part of the plan review process and subsequent foodservice permit issue. A good review of plans helps to avoid future problems. By listing and locating equipment on floor plans and diagramming specifications for electrical, mechanical and plumbing systems, potential problems can be spotted while still on paper and modifications made BEFORE costly purchases, installation and construction.

This packet consists of the following information:

- Mobile Food Establishment Plan Review Worksheet
- Sample Commissary Facility Agreement Document and Sample Service Area Agreement Document
- Application for a mobile unit permit

Please complete the attached documents and submit with the required plan review and permit application fees to the Environmental Health office at the local health department office. Approval from the local health department must be obtained prior to operation of your unit and should be considered prior to construction or purchasing a unit.

The following need to be submitted with your completed application and fees to expedite review and approval of your permit request:

1. Full menu—***Note: the available equipment may dictate restrictions on the type of food prepared.***
2. Complete plans of the unit and commissary, if applicable, drawn to scale, including placement of all equipment. (Plan review is conducted by the local health department within 30 business days of receipt.)
3. List of all equipment necessary for the operation of the unit.
4. Cut sheets, manufacturer’s specifications or photos of the unit and all equipment.
5. A description of the construction materials used on the unit, including surface finishes for floors, walls, ceilings and countertops (as applicable).
6. Information relating to your base of operation, including approximate dates of use.
7. Service dates and location (area where you will be operating the unit) for the next month (to allow for in operation inspection).
8. Letter of agreement for proposed Commissary (pushcarts) or Service area (mobile units) that is signed by owner of facility (see attached sample document). Wastewater disposal is required for all mobile food establishments unless your unit is serving only prepackaged foods and bottled/canned drinks. **Note: The local health department will evaluate the proposed dump site to ensure the design of the septic system can handle the proposed volume and strength of the waste water from your pushcart or mobile unit. This will be based on your menu and an evaluation of the potential daily volume of wastewater**

9. Applicant is responsible for obtaining any required approvals from other agencies, such as zoning/planning, business license, building, city or county authorities and the Department of Motor Vehicle registration/license as applicable.

Note: If mobile unit is vending only prepackaged non-potentially hazardous foods a permit is not required; however, an application with description of proposed operation is needed. If vending potentially hazardous foods, an application and permit is required.

If you have questions about whether prepackaged foods proposed are potentially hazardous or not please contact an environmental health specialist from your local health department:
