**SECTION F -STATISTICAL DATA REQUIRED FOR TECHNICAL, MANAGERIAL, & FINANCIAL (TMF) REVIEW**

1. Connections and Population:

| ID | Data Description                     | Connections | Population <sup>(4)</sup> |
|----|--------------------------------------|-------------|---------------------------|
| a. | Existing residential – Entire System |             |                           |
| b. | Existing total – Entire System       |             |                           |
| c. | Project residential <sup>(1)</sup>   |             |                           |
| d. | Project total <sup>(1)</sup>         |             |                           |
| e. | Future residential <sup>(2, 3)</sup> |             |                           |
| f. | Future total <sup>(2, 3)</sup>       |             |                           |

Notes:

- (1) New connections and/or existing connections that benefit from the project.
- (2) For a water line extension project, e. = a. + c. and f. = b. + d because new connections are being added. For any project that benefits existing connections only, e. = a. and f. = b., and then c. and d. will reflect how many existing residential and total connections, respectively, benefit from the project.
- (3) For a project that benefits existing connections (e.g. – water line replacement) **and** also adds new connections (water line extension) then c. and d. will reflect how many residential and total connections, respectively, benefit from the project (connections that benefit from the project + new connections). In this case, e. = a. + new residential connections added and f. = b. + new total connections added.
- (4) Provide population estimates based on the previous column (connections).

2. Water Usage and Losses

- a. What is the current monthly average number of gallons of water used per residential connection? \_\_\_\_\_ gallons/month.  
 Use total annual gallons billed for in–town residential customers divided by 12 months and divided by the total number of in-town residential customers. Provide supporting documentation as **Attachment J6**.

- b. Provide the percent of water loss within the system. Unbilled authorized consumption (e.g., firefighting) should be excluded. Provide supporting documentation **as Attachment J7**.

Water losses as a percentage of total production. = \_\_\_\_\_%

This percentage includes:  Real water losses (Physical losses from leaks/bursts in the distribution lines and tank overflows)  
 Apparent water losses (includes metering inaccuracies and unauthorized usage [theft/illegal use])

3. Individual water meters are on:

- All services  
 Only commercial accounts  
 Only residential customers  
 Some services: Provide additional information: \_\_\_\_\_  
 None are metered.

If none are metered, is metering included in this project?  Yes  No.

Explanatory statement, if appropriate: \_\_\_\_\_

4. Rates: **Attach rate schedules as Attachment J8**

a. Existing monthly water charges (explain here): \_\_\_\_\_

b. When were water rates last increased? **Please provide dates and amount/percentage of increase as Attachment J8.**

c. What is your connection fee for water? \_\_\_\_\_

d. Are rate increases anticipated as a result of this project?  Yes  No  
 If yes, please provide the amount and percentage increase expected and the anticipated effective date for the increase(s).

5. Water Users

| a. Service Area Jurisdictions | b. # Of Existing Residential Connections | c. # Of Project Residential Connections at Completion |
|-------------------------------|--|---|
| _____                         | _____                                    | _____   |
| _____                         | _____                                    | _____   |
| _____                         | _____                                    | _____   |

d. Existing drinking water usage \_\_\_\_\_ gpd. \_\_\_\_\_ % Residential \_\_\_\_\_ % Nonresidential

e. As **Attachment J9**, identify Ten (10) Largest Users of the Water System and Estimated Monthly Consumption per user.

6. Determine Average Monthly Residential Water User Rate: \_\_\_\_\_

Provide an average monthly residential water user rate analysis **as Attachment J10** - using VDH project only template.

Average Monthly Residential Water User Rate = \$ \_\_\_\_\_ /month

7. Target User Rates:

Target user rates are set as a percent of Median Household Income (MHI). The annual MHI utilized for a project is to be based upon the latest census figures or latest update for the city, town or county in which the waterworks is located. Multiply by 0.01 (or 1%) and divide by 12 months to get the monthly target rate.

MHI (from item Section C, II, D. Above) = \$ \_\_\_\_\_ x 0.01 = \$ \_\_\_\_\_ /month. This is your **Target User Rate**.  
 (12 months/year)

8. Evaluate Current Rate Structure:

Does the value in Item 6 (water user rate) equal or exceed the value in item 7 (target user rate), above? Yes  No

If you answered “Yes”, your waterworks/project may qualify as **Disadvantaged**. However, rate increases/adjustments may be required to meet debt obligations or pass a VRA credit review.

If you answered “No” then the information indicates the owner needs to adjust water rates to ensure adequate revenues. Having adequate financial resources is crucial to maintaining a successful and sustainable waterworks. Furthermore, EPA mandates that all borrowers receiving program assistance must demonstrate full financial capacity in order to receive funds.

Waterworks are expected to meet or exceed the target rate criteria at or before the time of project completion. VDH reserves the right to require a rate revision plan and implementation schedule acceptable to VDH.

9. Do you have any outstanding debt related to the water and sewer (if applicable) system?  Yes  No

If yes, have you requested that new debt be issued on parity with the old?  Yes  No

**Provide documentation as Attachment J11.**

10. Annual Operation, Maintenance and Replacement (O, M & R). Estimated Cost for Proposed Facilities: From PER or other sources based on existing PWS’s financial statements.

- a. Labor \$ \_\_\_\_\_
- b. Utilities \$ \_\_\_\_\_
- c. Materials \$ \_\_\_\_\_

- f. Miscellaneous Expenses \$ \_\_\_\_\_
- g. Equipment Replacement \$ \_\_\_\_\_
- h. Total O, M & R Cost \$ \_\_\_\_\_

11. Estimated Annual Water Facilities Costs - From PER or other sources based on existing PWS’s **Financial Statements**

- a. Net O, M & R (for existing water facilities) \$ \_\_\_\_\_  
**USE Financial Statements**
- b. Existing Annual Debt Service for water system \$ \_\_\_\_\_  
**USE Financial Statements**
- c. O, M & R for Proposed Facilities \$ \_\_\_\_\_
- d. Total (Sum of a+b+c) \$ \_\_\_\_\_

12. Sources of Residential and Nonresidential Revenues as a Percentage of Total Annual Water Revenue

- a. Residential \_\_\_\_\_%
- b. Nonresidential \_\_\_\_\_%

\*\*VDH reserves the right to apply a closing fee of \$6,000 for all applicable loan offers to defray the cost of this service. The \$6,000 may be included in the principal of the loan. If VDH determines a loan closing fee does not apply it will be eliminated from the final budget.

**SECTION H – SUSTAINABILITY/RELIABILITY/GPR/CLIMATE READINESS**

**1. Asset Management Plan:**

To qualify for Asset Management Plan (AMP) credit, a waterworks must provide documentation **as Attachment J16** which demonstrates a minimum of the following for the waterworks:

- *Letter from VDH-ODW that the AMP has been accepted (if applicable)*
- *If AMP has been accepted by VDH-ODW, documentation that the proposed project is included.*

**2. Green Project Reserve (GPR) Business Case:**

All applicants must submit to qualify for credit as Green Project Reserve (GPR); a waterworks must show that its proposed DWSRF-funded project has significant (not incidental) green benefits. For credit, the project must provide green infrastructure, promote water and/or power efficiency, or provide other innovative environmental benefits. This information must be reported as the **TOTAL AMOUNT OF PROJECT COSTS WHICH QUALIFY AS GPR**. Only include the costs that the DWSRF will be funding. For example, if the project is asking for \$100,000 for a 100% meter replacement project, then report \$100,000. IF there are no identifiable, benefits enter “zero” GPR dollars. Attach additional sheets as needed.
