10 Warning Signs Of Alzheimer’s

1. Memory Loss
2. Challenges in Planning or Solving Problems
3. Difficulty completing tasks at home, at work or at leisure
4. Changes in Mood or Personality
5. New problems with words in speaking or in writing
6. Misplacing things and losing the ability to retrace steps
7. Confusion with time or place
8. Trouble understanding visual images and spatial relationships
9. Decreased or poor judgment
10. Withdrawal from work or social activities

If these signs are new, they may be a sign of dementia. Dementia is not a part of normal aging. If you think that these problems are affecting your daily life, or the life of someone you know, you should talk to your doctor or seek out more information from your national Alzheimer or dementia association.
