Persuasive Communications
- Who Talks to You?

• Recall a time when someone has effectively OR ineffectively engaged you in trying to sell something to you or persuade you to do something

• *Please type your response in the chat*
Health Communication Obstacles

• Uncertainty, complexity
• Distrust (Government, Science, youth, age, etc.)
• Conflicting evidence
• Selective/Biased reporting by the news media
Health Communication Obstacles

• Rumors, Misinformation, Disinformation
• Emotion overcomes logic
• Language & culture
• Physical presence vs. virtual
Outreach about Prevention

- What’s the purpose?
- *(Type in Chat)*

**FIGHT BAC!**

*Keep Food Safe From Bacteria*

Ready

*Do It Yourself* Emergency Kit

*VDH VIRGINIA DEPARTMENT OF HEALTH*

To protect the health and promote the well-being of all people in Virginia.
People Don’t Want to Change

- Beliefs
- Values
- Traditions, culture
- Experience
- Anecdotal evidence
- Distrust of authority
- Inertia/resistance to change
Changing Health Behavior

- Consider risks of current behavior
- How serious are those risks?
- Recognize benefits and motivators to change behavior
- Overcome the barriers
- Use effective strategies: “You can do it - and here’s how!”

- Adapted from the Health Belief Model
Communicating Prevention

Scenario

1. Who is your audience (age, gender, etc.)?

2. How you would address:
   - Risks of current behavior
   - Seriousness of risks
   - Benefits/Motivations
   - Overcoming barriers
   - Effective Strategies
Your clients will judge your message by its **content**, its **messenger** and its **method of delivery**.
Communications Basics

• Communication frequency
• Interactive listening
• Talking is NOT communicating
• Hearing and listening are different
• We can “hear” without choosing to listen
• Engaging for action

"You weren’t listening. I said, 'DON’T fall.'"
Be an Active Listener

• Look at the speaker
• Turn your body toward the speaker
• Nod, or give verbal encouragement
• Concentrate on what’s being said
• Ask clarifying questions
Avoid

- Criticizing
- Second guessing
- Discounting
- Lecturing
- Placating
- Rationalizing
- Generalizing

- Letting feelings interfere with your ability to communicate positively.
- Conveying disgust, frustration, indifference or fear.
Handling Citizen Feedback

• As a VDH MRC representative,
  - “I hear your point”

• Do not respond to individual medical questions; refer to physician, clinic, etc.

• It’s ok to say, “That’s a great question, I don’t know the answer.”

• Turn negatives into positives and always bridge back to your key message(s).
Bridging Phases

- “What is most important is ....”
- “What we should focus on is ...”
- “What the public should know is ...”
- “That speaks to a larger point ...”
- “I don’t know that answer, but what I can tell you is ....”
Emergency Events

• Clinics/Points of Dispensing (PODs)-COVID vaccine/testing, Flu, etc.
• Environmental Hazard
• Outbreak
• Weather
• Drills/Exercises
• Other?
Delivering the Message
Risk Communication Goals

• Show empathy for fear, confusion and frustration
• Empower audience to make informed decisions
• Discourage negative behavior and encourage constructive actions
Risk Communication Tips

• Don’t over reassure; everything may *NOT* be o.k.

• Relate/repeat general facts about the incident or event

• Limit information to what has been released
Risk Communication Tips

• Admit what we don’t know at present
• Specify corrective and protective actions to take to protect self and family
• “Here’s what you can do.”
COVID-19 Communications

• 1-877-Vax-In-VA (or local hotline)
• Website: Vaccinate.Virginia.Gov
• Join COVID Ambassadors - (www.covidcommunityambassadors.com/)
• Follow VDH/HDs on Social media and share
• Get resources from your MRC Unit for outreach
Remember ...

- Changing health behavior is a challenge
- Engage in active listening, empathize
- In emergencies, use risk comms principles
- Answer questions thoughtfully
- Recognize people’s frustrations and communicate empathy and compassion
- Refer to resources where appropriate
Thank YOU
for choosing to volunteer with the Virginia Medical Reserve Corps!

YOU are the force multiplier that makes Virginia better prepared and resilient!
