Purpose
The Virginia Healthcare-Associated Infections (HAI) Advisory Group (VHAG) is a voluntary, statewide, multidisciplinary group that coordinates the efforts of the Commonwealth’s HAI stakeholders to align strategies, share information and resources, and produce synergies that will accelerate statewide and individual institutional progress in preventing HAIs and antimicrobial resistance (AR). The group includes persons with expertise in the surveillance, prevention, and control of healthcare-associated infections, including representation from the Virginia Department of Health and other state agencies, Health Quality Innovators (HQI), the Virginia Quality Innovation Network – Quality Improvement Organization (QIN-QIO), the Virginia Hospital and Healthcare Association, the Association for Professionals in Infection Control and Epidemiology – Virginia Chapter (APIC-VA), healthcare providers, infection preventionists, pharmacists, consumers, and physician champions.

Mission
The mission of the VHAG is to improve health outcomes in all of Virginia’s healthcare settings, with the ultimate goal of preventing HAIs and AR. We will accomplish this mission by convening stakeholders to:

- Identify and recommend evidence-based best practices for monitoring and preventing targeted HAIs, including strategies for reporting, surveillance and education of providers and consumers;
- Encourage healthcare settings to adopt high reliability practices and principles to promote a culture of safety and sustain improvements over time; and
- Proactively address emerging HAI and AR topics.

Member Objectives
- Serve as leaders for HAI and AR prevention in Virginia.
- Provide input and updates to the state HAI plan and stakeholder initiatives.
- Identify specific HAI prevention targets for Virginia consistent with the priorities established by the U.S. Department of Health and Human Services and the Commonwealth of Virginia.
- Develop initiatives to meet target goals. Recommend strategies for translating evidence-based guidelines into practice in Virginia’s healthcare settings.
- Raise awareness statewide about the importance of HAI and AR prevention progress, areas for improvement, and opportunities for collaboration and participation.
- Align strategies to address HAIs and AR by facilitating collaboration, thus providing synergy among participating stakeholders and the organizations they represent.
- Ensure consistent, unified messaging by HAI stakeholder organizations, avoid duplication of effort, and maximize the effective use of available resources.
Membership Overview

**Virginia HAI Advisory Group Membership Overview**

### Leadership

<td>Virginia Hospital &amp; Healthcare Association</td>
<td>Health Quality Innovators</td>
</tr>
</tbody>
</table>

- Maintain VHAG Website
- Maintain Membership Database
- Host Quarterly VHAG Meetings
- Maintain VHAG Meeting Calendar
- Develop Annual Strategic Plan
- Maintain & Promote Membership
- Coordinate & Produce Quarterly VHAG Meetings

### Membership

All members must maintain current contact information and roles/strengths with VHAG Program Manager. All VHAG members should maintain engagement as a stakeholder and/or workgroup member.

#### Stakeholders

Representatives of Member Organizations

- Attend (or appoint alternate) quarterly VHAG meetings
- Update on relevant information, such as:
  - Upcoming events
  - Current priorities
  - Changes in leadership
- Plan for succession
  - Name an alternate to replace organization representation
- May designate personnel to join and support workgroups as a Member at Large
  - Member organization designees are not required to participate in the Advisory Group and are not considered Advisory Group members

#### Workgroups

- **Annual Priority**: Every year, this workgroup decides on a specific HAI or AR topic that has statewide implications, and for which VHAG could make impacts in a calendar year and/or put processes in place for the future.
- **Safe Antibiotic Stewardship Innovators (SASI)**: The Antibiotic Stewardship workgroup aims to ensure the appropriate use of antibiotics, improve patient outcomes, decrease adverse effects, reduce antimicrobial resistance, and decrease healthcare costs.
- **Infection Prevention Education**: This workgroup focuses on providing education and training for healthcare workers in order to provide tools and resources to help decrease HAIs. It also assists other workgroups with educational support on current priority issues and healthcare concerns related to HAIs.

#### Three Tiers of Participation within each Workgroup

- **Workgroup Chairs**
  - Each workgroup is recommended to have a lead and secondary chair
  - Ensure completion of annual priorities proposal* & year end summary
  - Schedule & maintain workgroup meetings
  - Ensure workgroup maintains progress toward annual priorities
  - Coordinate with workgroup members when necessary
  - Provide workgroup progress updates at quarterly VHAG meetings
- **Full Member**
  - Contribute to planning
  - Attend workgroup meetings
  - Provide significant input on work products
  - Attendance at quarterly VHAG meetings is strongly encouraged
- **Member at Large**
  - Provide limited availability
  - Provide subject matter expertise
  - Attendance at regular workgroup meetings is optional
  - Attendance at quarterly VHAG meetings is not expected

### Recognition

Workgroup chairs and full members shared on the VHAG website. VHAG leadership will compile and publish (on VHAG website) yearly workgroup accomplishments. Members who attend ≥75% of meetings will receive a certificate of participation.

*Template Priorities Proposal provided to all workgroups*
