

Proactive Infection Prevention and Control Assessments in Healthcare Facilities

Partnership in Prevention

The Virginia Department of Health wants to work with your healthcare facility to strengthen your infection prevention and control (IPC) program to enhance the safety of patients/residents and healthcare personnel.

Adapted to Your Setting

During an on-site visit, VDH will use a setting-specific tool to assess your IPC program. Visits are consultative, non-regulatory, and are provided at no cost. Target settings include: acute care, hemodialysis, long-term acute care, nursing home, and outpatient facilities.

Ask Us All Your IPC Questions!

Our IPC subject matter experts will work with you to review your IPC program and offer feedback tailored to your unique facility.

Ongoing Relationships

VDH will make these visits simple and valuable while looking forward to growing our partnership. We will work with you after the assessment to troubleshoot challenges and review progress on your action plan.

Together we can make Virginia's healthcare facilities safer!

Facilities may schedule a FREE infection prevention assessment on the [VDH website](#).

For more information, please visit the [VDH Infection Control Assessment and Response website](#) or contact the VDH HAI/AR team at hai@vdh.virginia.gov.
