

Lake Anna - Harmful Algae Bloom (HAB) Report

Issued: Tuesday 9/13/2022

Next Issue: on or about week of October 10th

- Harmful algae (cyanobacteria) concentrations exceed safe levels.
- Harmful algae (cyanobacteria) concentrations below safe levels.
- Lake area under HAB swimming advisory.

HELPFUL TIP:

Visit www.SwimHealthyVa.com and click on the Harmful Algae Bloom Map to review sample results near you!

Expand the map using the symbol in the upper right hand map title bar, then click on the magnifying glass. You can search by location name or address!

Samples collected at 5 sites on the Pamunkey Branch (including Terry's Run), and the North Anna Branch on 9/6/22 indicated a cyanobacteria bloom with cell concentrations was present at unsafe swimming levels. While the levels at the State Park Beach were acceptable, two samples at least 10 days apart with acceptable levels are needed to lift the advisory (9/6 was the first acceptable sample). The HAB map and this report are posted at www.SwimHealthyVa.com. Follow-up response monitoring is anticipated for the first week of October, weather permitting.

Avoid swimming, fishing or letting your children or pets play in bodies of water that:

- Smell bad
- Look discolored
- Have foam, scum, or algal mats on the surface

BE AWARE of Harmful Algae Blooms

Water quality is tested to determine if health risks may be present.

During an algae bloom, water may have surface scum, mats, or films with red, green, white streaks, or glops.

For more information or to report an algae bloom visit www.SwimHealthyVA.com

To report a HAB-related illness contact the HAB Hotline at 888-238-6154.
