

MISSION STATEMENT

As an interdisciplinary team, we review and analyze sudden, violent, or unnatural deaths of children so that strategies can be recommended to reduce the number of preventable child deaths in Virginia.

Author

Suzanne J. Keller, M.A.

Reviewers

The State Child Fatality Review Team

Acknowledgments

The State Child Fatality Review Team gratefully acknowledges the efforts and contributions made to produce this report of the following individuals and agencies: Ron Hyman, Center for Health Statistics, Judy English, Department of Social Services, and Marsha Dietz, Department of Criminal Justice Services. The number of agencies and individuals throughout the Commonwealth who provided information for the firearm fatality review are too numerous to elaborate. Nevertheless it could not have been undertaken without their cooperation and commitment to the child fatality review process in Virginia. We thank them for their contributions and their support for the goal of reducing preventable child death in the Commonwealth.
