

RESEARCH VOLUNTEERS NEEDED

The NIH Vaccine Research Center is looking for adults over age 18 who are fully recovered from COVID-19 infection to donate blood for studies on the immune system.

Individuals must have *one* of the following recovery criteria to participate:

- Be 30 days post positive swab
- Be 14 days post symptoms having resolved, including 14 days after last use of medication to reduce temperature or manage symptoms
- Have 2 negative nasal swabs

As these studies aim to further define and understand specific immune responses, the Vaccine Research Center is not evaluating or studying active or possible COVID-19 infections.

Participants will be compensated for their time and inconvenience.

To volunteer, call 1-866-833-5433 (TTY 1-866-411-1010), email recoveredCOVID@nih.gov or visit <https://bit.ly/2JvwWJV>.
