Children ages 5 to 11 can get a kid-size COVID-19 vaccine.

It's how kids can have fun and stay safe!

Parents: Learn more and find a vaccination location at vaccinate.virginia.gov

VACCINATE
VIRGINIA

Keep Kids Safe!

The FDA has authorized, and the CDC recommends, a kid-size COVID-19 vaccine for children ages 5 to 11. The vaccine is safe and helps prevent serious illness.

Also, make sure that children:

- Wear a mask in public to keep COVID-19 from spreading.
- Wash their hands with soap and water.
- Cover sneezes and coughs.
- Stay home when sick to keep everyone healthy.

Parents: Learn more and find a vaccination location. Visit vaccinate.virginia.gov or call (877) VAX-IN-VA.
