

New!
Improved Design
Also Accommodates 4" Corrugated Pipe

POLYLOK® PIPE SEAL

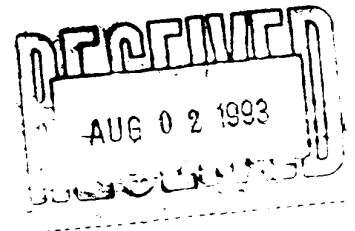

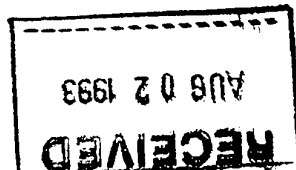

A low pressure pipe seal for septic tanks, d-boxes and more. Accommodates all 2", 3", and 4" smooth wall pipe, as well as 4" corrugated pipe.

United Concrete's innovative, low pressure, Polylok Pipe Seal is easily cast into septic tanks and d-boxes, eliminating the need for grouting of pipe connections.

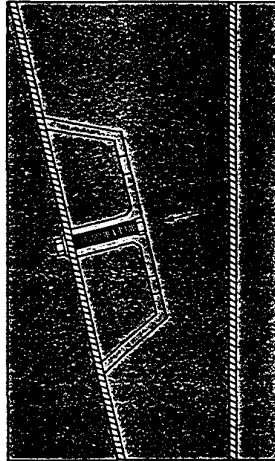

The addition of Polylok to your product assures your customer that every pipe connection will be quick, easy and watertight, thus reducing their labor costs.

Give your product the competitive edge with Polylok Pipe Seals ... your customers will be glad you did.

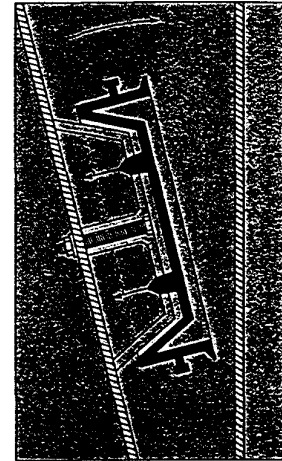

Advantages of using United's Polylok:

- **Reliable**
Assures a fast, watertight connection...every time.
- **Watertight**
Prevents infiltration and exfiltration.
- **Labor saving**
No grouting necessary for secure pipe connection.
- **Adaptable**
Existing forms can be easily modified to accommodate Polylok.
- **Cost effective**
The addition of low cost Polylok seals will reduce customer's labor costs and help increase your sales.
- **Versatility**
One size Polylok fits all 2", 3" and 4" smooth wall pipe, as well as 4" corrugated pipe.

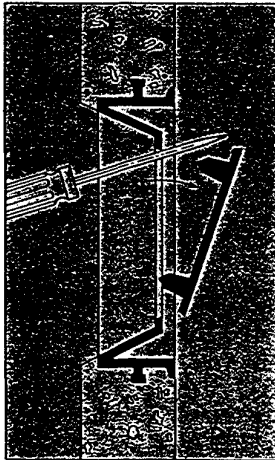

Polylok Pipe Seal Installation

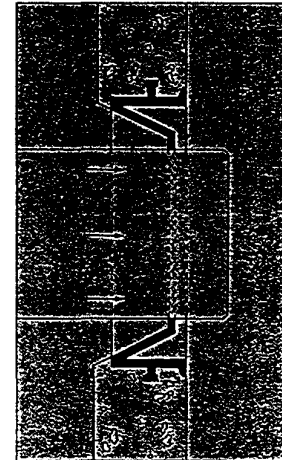

1. Adaptor plug is cut to $\frac{1}{8}$ " less than the wall of the septic tank. Adaptor is then attached with a single $\frac{3}{8}$ " carriage bolt.

2. Polylok snaps onto the adaptor and is held securely by two "friction fit" positioning posts. Form is then closed and is ready to pour and strip.

3. Once on job site, appropriate knockout is easily punched out by a screwdriver or key to accommodate pipe size. **DO NOT USE A KNIFE**, it may damage the integrity of the seal.

4. Pipe is then inserted into the Polylok. No leaks. No grout. It's that simple.

It's time to upgrade your product with the Polylok Pipe Seal...your customers will be glad you did.

CERTIFICATE OF LISTING

Samples of the product described herein have been tested by an independent testing laboratory and have been reviewed and accepted for listing by the Plumbing Research Committee of the International Association of Plumbing and Mechanical Officials as meeting the requirements of the Uniform Plumbing Code™. This listing is subject to the conditions set forth in the characteristics below and is not to be construed as any recommendation, assurance or guarantee by the Association of the product or of product acceptance by local jurisdictions or authorities using the Uniform Plumbing Code™ or otherwise affiliated with the Association.

Accepted August 1992

Void After August 1993

PRODUCT: Pipe Seals

FILE NO. 2832

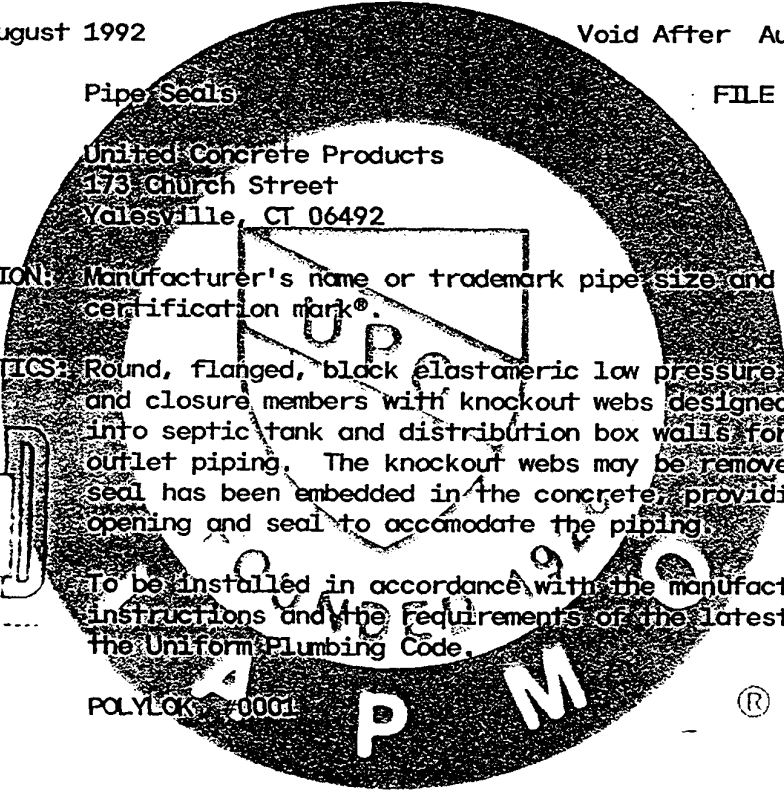

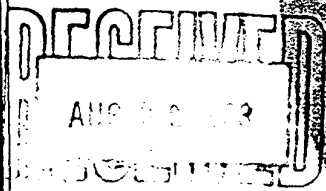

APPLICANT: United Concrete Products
173 Church Street
Yalesville, CT 06492

IDENTIFICATION: Manufacturer's name or trademark pipe size and UPC certification mark®.

CHARACTERISTICS: Round, flanged, black elastomeric low pressure pipe seals and closure members with knockout webs designed to be cast into septic tank and distribution box walls for inlet and outlet piping. The knockout webs may be removed after the seal has been embedded in the concrete, providing an opening and seal to accommodate the piping.

To be installed in accordance with the manufacturer's instructions and the requirements of the latest edition of the Uniform Plumbing Code.

MODELS: POLYLOCK 70001

This listing is for the period indicated herein and is void after date shown above. Any change in material, manufacturing process, marking or design without having first obtained the approval of the Plumbing Research Committee, or evidence of non-compliance with applicable standards or of inferior workmanship, may be deemed as sufficient cause for revocation of the listing. Reproduction or reference to this form for advertising purposes may be made only by specific written permission of the International Association of Plumbing and Mechanical Officials. This authorizes the use of the UPC® certification mark on products covered by this certificate.

Any alteration of this certificate could be grounds for revocation of the listing.
