**Survey Period:** October 21, 2016  
**Total Number of Properties Surveyed:** 0  
**Surveyed By:** L.M. Sakach

**SECTION A: GENERAL**

This survey area extends from Reference Point 68 at the western end of the Hampton Roads Bridge Tunnel (east end of Ocean View Avenue) to Reference Point 69 located at the end of Chesapeake Street extending to the waters edge, including all of the southern Chesapeake Bay shoreline between these two points.

The topography of the area is predominately flat with elevations not exceeding 15-20 feet. The survey area is almost entirely residential with some commercial development located along Ocean View Avenue. The entire area is served by Hampton Road Sanitation District (HRSD) sewage system. The economy of the area is based on local service industries, military installations and seasonal water recreation.

There was 0.02" of rainfall on the day of the survey.

There are currently no restrictions on shellfish harvesting in the survey area. Copies of Bacteriological, Hydrographic and Shellfish Closure data are available at the area office for review. Copies of the current condemnation notices and maps are available via the Internet at [www.vdh.virginia.gov/shellfish/](http://www.vdh.virginia.gov/shellfish/).

This report lists only those properties that have a sanitary deficiency or have other environmental significance. "***DIRECT***" indicates that the significant activity or deficiency has a direct impact on shellfish waters. Individual field forms with full information on properties listed in this report are on file in the Richmond Office of the Division of Shellfish Sanitation and are available for reference until superseded by a subsequent survey of the area. Data in the report is also made available to local health departments and other agencies to address items that may be out of compliance with their regulatory programs.
