SECTION A: GENERAL

This survey area extends from Reference Point 71 on the western bank of Lynnhaven Inlet at the Lesner Bridge to Reference Point 72 at the bridge near the end of Inlet Road at the southern mouth of Long Creek, including the Lynnhaven River shoreline between those two points Crab Creek, Please House Creek, Western Branch of the Lynnhaven River (Bayville Creek, Thoroughgood Cove, Witch Duck Bay, Thurston Branch of Thalia Creek, Buchanan Creek, Hebden Cove); Lynnhaven Bay (Keeling Cove, Dix Creek, Poorhouse Cove); Eastern Branch of Lynnhaven River (Pinetree Branch, London Bridge Creek, Wolfsnare Creek, Brown Cove, Great Neck Lake), Brock Cove, Keeling Drain, and all their tributaries.

The topography of the area varies from 5’ or less along the shoreline to a maximum of 25’ near the outer edge of the survey boundary. The population density is high throughout most of the primarily sewered area. The economy is based on service oriented businesses, tourism, and nearby military installations. In 2014 the City of Virginia Beach began construction of the new Lesner Bridge which will eventually replace the old structure and was underway during the survey.

The City of Virginia Beach has continued its ongoing sewering of the survey area. All homes located in the Little Neck subdivision have been sewered since the previous survey (conducted in 2007). The last remaining area of onsite sewage disposal systems is located on Addington Road. Meteorological data indicated that 0.0” of precipitation fell on June 10.

Copies of bacteriological, hydrographical, and shellfish closure data are available at the area field office for review. Copies of the current condemnation notices and maps are available via the internet at www.vdh.virginia.gov/shellfish/.

This report lists only those properties that have sanitary deficiencies or have other environmental significance. "DIRECT" indicates that the significant activity or deficiency has a direct impact on the shellfish growing area waters. Individual field forms with full information on properties listed in this report are on file in the Richmond Office of the Division of Shellfish Sanitation and are available for reference until superseded by a subsequent survey of the area. Data in the report are also made available to local health departments and other agencies to address items that may be out of compliance with their regulatory programs.

Shoreline Survey # 070
SUMMARY

Growing Area # 070
Lynnhaven Bay
5 August 2016

SECTION B: SEWAGE POLLUTION SOURCES

1. SEWAGE TREATMENT WORKS
   0 – DIRECT – None
   0 – INDIRECT – None
   0 – B.1. TOTAL

2. ON-SITE SEWAGE DEFICIENCIES – Correction of deficiencies in this section is the responsibility of the local health department.
   0 – CONTRIBUTES POLLUTION, DIRECT – None
   0 – CONTRIBUTES POLLUTION, INDIRECT – None
   0 – CP (Kitchen or Laundry Wastes), DIRECT – None
   0 – CP (Kitchen or Laundry Wastes), INDIRECT – None
   0 – NO FACILITIES, DIRECT – None
   0 – NO FACILITIES, INDIRECT – None
   0 – B.2. TOTAL

3. POTENTIAL POLLUTION – Periodic surveillance of these properties will be maintained to determine any status change.
   0 – POTENTIAL POLLUTION – None

SECTION C: NON-SEWAGE WASTE SITES

1. INDUSTRIAL WASTE SITES
   0 – DIRECT – None
   0 – INDIRECT – None
   0 – C.1. TOTAL

2. SOLID WASTE DUMPSITES
   0 – DIRECT – None
   0 – INDIRECT – None
   0 – C.2. TOTAL

SECTION D: BOATING ACTIVITY

   0 – MARINAS – None
   1 – OTHER PLACES WHERE BOATS ARE MOORED – # L1
   0 – UNDER SURVEILLANCE – None
   1 – D. TOTAL

SECTION E: CONTRIBUTES ANIMAL POLLUTION

   0 – DIRECT – None
   0 – INDIRECT – None
   0 – E. TOTAL
