Re: NSF/ANSI Standard 40 and 245 –Delta E50-N, E60-N and E75-N with Infiltrator tanks
NSF Rush Project 9127233, J-109619

Dear Mike,

We have completed the review of the proposed Delta E50-N-IM1060, E60-N-IM1060 and E75-N-IM1060 Wastewater Treatment Unit models. The key elements of the review included:

- Determining whether the requirements of NSF/ANSI Standard 40 (2010) will continue to be met.
- Determining whether the requirements of NSF/ANSI Standard 245 (2010) will continue to be met.
- Determining whether the requirements of the NSF Certification Policies for Wastewater Treatment Devices will continue to be met.

Based on this review, NSF can authorize the E50-N-IM1060, E60-N-IM1060 and E75-N-IM1060 as part of the certified treatment systems in the ECOPOD series.

If you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Sharon Steiner".
