### CERTIFIED MAIL

Dear Ms. Shamblin:

Re: GMP #116, Infiltrator Systems, Inc. ("ISI"), Quick 4™ Equalizer 36  
Chamber

On February 9, 2005, ISI submitted a request to revise its (GMP #116) design manual by adding a product referred to as the "Quick 4™ Equalizer 36 Chamber." The submittal consisted of a revised Sizing Chart (with a column added for the new product) and supporting calculations. The Virginia Department of Health ("VDH") has completed its review of the revised Sizing Chart submitted pursuant to Guidance Memoranda and Policies (GMP) #116.

Based on the information provided, we find that the revised Sizing Chart (copy enclosed) with the addition of the Quick 4™ Equalizer 36 Chamber substantially complies with the requirements of GMP #116. Effective immediately, ISI is hereby granted specific authorization pursuant to GMP #116 for the installation of Substituted Systems in accordance with the revised Sizing Chart and existing authorizations. This authorization will remain in effect until it is terminated by VDH or by ISI in writing.

Please call me at (804) 864-7458 if you have any questions.

Sincerely,

Allen L. Knapp, Program Manager  
Division of Onsite Sewage and Water Services
