

# VIRGINIA CHILDHOOD VACCINATION SCHEDULE

BIRTH - 6 YEARS

Updated 8/2025

## Combination Vaccines

Many vaccines are combined into one shot. This is proven to be safe and effective, helping lower the number of shots your child will get.

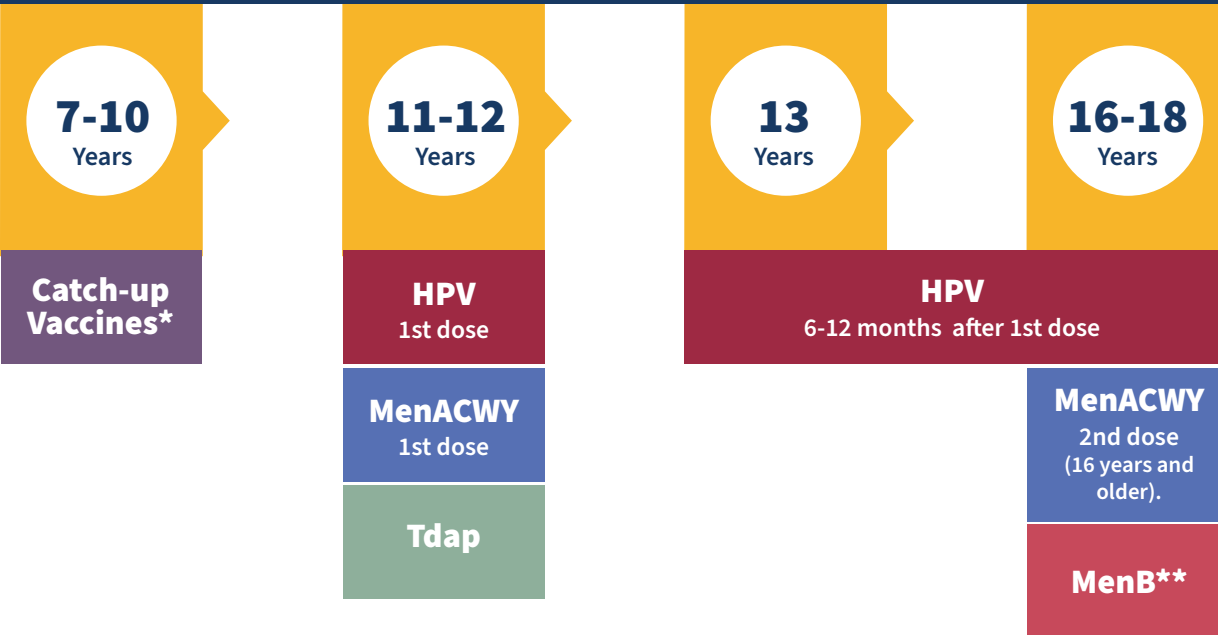

## Herd Immunity

This protects your community from disease by immunizing as much of the community as possible. This helps protect babies, the elderly, and others who get sick easily!

# VIRGINIA ADOLESCENT VACCINATION SCHEDULE

7 YEARS- 18 YEARS

Updated 8/2025

Annual Flu Vaccine For Everyone 6 Months and Older

## School Requirements

The Code of Virginia requires children entering daycare, public and private schools to give proof of vaccination before enrolling in school. The vaccines should be given based on the schedule recommended by the CDC, American Academy of Pediatrics, and American Academy of Family Physicians. Please **visit** our website to learn more about school immunization requirements and exemptions:

<https://www.vdh.virginia.gov/immunization/requirements/>

## Vaccine Catch-Up & Dose Spacing\*

If your child is missing any vaccines, be sure to ask your provider about the **catch-up** schedule so your child is fully protected. Doses of **MMR** and **Varicella** should be spaced **28 days** apart, should complete by Kindergarten.

## HPV Vaccine

The **HPV** vaccine is the only vaccine that helps to prevent cancer! In **Virginia**, it is required **before** going to **7th** grade. For more information on **HPV** vaccine requirements and the **HPV** vaccine opt-out clause, please visit the following website: [https://www.vdh.virginia.gov/content/uploads/sites/11/2025-Rising-7th-Graders-Letter\\_Signed\\_English.pdf](https://www.vdh.virginia.gov/content/uploads/sites/11/2025-Rising-7th-Graders-Letter_Signed_English.pdf). Please be sure your child finishes the **HPV** series vaccine by **age 13**, for the most protection. If your child is **15 years** or older at the time of the first shot of HPV, they will need **3 doses** for full protection.

## Serogroup B Meningococcal Vaccine (MenB)\*\*

Older teens and young adults (**ages 16-23**) can receive the **MenB** vaccine. Talk with your child's **health care provider** to learn if the **MenB** vaccine is right for your teen.

**Health care providers** - physicians, specialists, physician assistants, nurse practitioners, registered nurses, etc.
