Stop Syphilis.

It starts with a painless sore or bump on your genitals. Then a body rash. It can turn deadly, hurting your brain, heart, hearing, and eyesight. If you're sexually active in Hampton Roads, your risk of getting syphilis is high. But an easy blood test can find out if you have the infection, so you can get the help you need.

Find testing spots and more information at: **StopSyphilisNow.com**.

Stop Syphilis.

It starts with a painless sore on your genitals, then a body rash, then it can turn deadly—affecting your brain, nervous system and heart. If you're pregnant, you can pass it to your unborn baby. And even scarier, this sexually transmitted infection is on the rise in Hampton Roads.

But it doesn't have to be this way. Get an easy blood test to find out if you have syphilis, so you can get the help you need.
