PREFACE

This directory is to assist EMS providers, agencies, public safety communication officials and healthcare providers with telephone, radio frequency and contact information for the Commonwealth of Virginia's EMS system.

The directory is available in electronic format at the Virginia Office of Emergency Medical Services website, www.vdh.virginia.gov/oems. The directory is designed to be updated as locations, frequencies, telephone numbers and other information changes. For updates, corrections and edits, contact the Virginia Office of Emergency Medical Services at 804/888-9100.

INSTRUCTIONS

The directory is divided into three sections; the first provides information for 911 centers, public safety answering points (PSAP's) and other agencies responsible for the dispatch of licensed EMS agencies in Virginia. Listed in alphabetical order is the jurisdiction, physical address, telephone numbers, dispatch frequencies and agencies dispatched.

The second section lists the medevac providers located within Virginia, their locations and contact information.

The third section lists hospitals. The physical address, telephone numbers, radio frequencies and coordinates. Also noted is if they are a level I, II or III trauma center. This section is sub-divided into regions, Eastern, Central, Northern, Northwest, Near Southwest and Far Southwest. The Regional Hospital Coordination Center is noted for the facilities which have the responsibility to coordinate medical oversight during large scale emergencies and disaster situations.

All frequencies listed in section three are designated for EMS to hospital contact. Designated VHF (very high frequency) radio frequencies, commonly referred to as "HEAR" (hospital emergency administrative radio) channels are;

155.280 MHz

155.340 MHz

155.400 MHz

These frequencies may have a continuous tone controlled squelch system (CTCSS) which must be accessed before opening the channel. CTCSS is also referred to as private line (PL) tones, channel guard (CG), private channel, call guard, etc. In this publication, they will be listed as CTCSS. The listing for these tones is provided below;

<u>Tone</u>	<u>Code</u>		<u>Tone</u>	<u>Code</u>

(* not a standard Electronic Industries Association Tone)

Dial Codes are provided for those facilities employing, these are accessed by using a Dual Tone Multi-Frequency (DTMF) signaling device.

Designated UHF (ultra high frequency) radio frequencies, commonly referred to as MED channels are as follows;

<u>Name</u>	<u>Base</u>	<u>Transmit</u>	<u>Mobile Transmit</u>
MED 1	463.000 MHz	468.000 MHz	
MED 2	463.025 MHz	468.025 MHz	
MED 3	463.050 MHz	468.050 MHz	
MED 4	463.075 MHz	468.075 MHz	
MED 5	463.100 MHz	468.100 MHz	
MED 6	463.125 MHz	468.125 MHz	
MED 7	463.150 MHz	468.150 MHz	
MED 8	463.175 MHz	468.175 MHz	
MED 9	462.950 MHz	467.950 MHz	Also called "CALL 1"
MED 10	462.975 MHz	467.975 MHz	Also called "CALL 2"

Med Tones follow the same basis as the CTCSS tones listed and are accessed by using a DTMF device.

MEDEVAC AGENCIES SERVING VIRGINIA

This map includes Medevac agencies located within Virginia or within 30 miles of its borders

For detailed information, go to the Virginia Office of EMS website at:
<http://www.vdh.virginia.gov/OEMS/Medevac/MedevacSystem.htm>

This document is intended to be a resource document only. There are multiple factors to be considered when a locality, hospital, or EMS agency wants to understand which Medevac agency can best serve their needs. There may not be any one single agency that can serve all the Medevac needs of an area, so understanding what resources are available and pre-planning are essential components to the decision making process.
