

**Trauma Performance Improvement Committee Meeting**  
**August 17, 2017**  
**12:00 PM - 1:00 PM**

<b>Members Present:</b>	<b>Members Absent:</b>	<b>OEMS Staff:</b>	<b>Others:</b>
Forrest Calland	Anne Mills	Dwight E. Crews	
Emory Altizer	Greg Stanford	Timothy Erskine	
Lou Ann Miller	Gary Critzer		
Bryan Collier	T. J. Novosel		
Valeria Mitchell	Marilyn McLeod		
	John Hyslop		
	Mike Aboutanos		
	Shawn Safford		

	<b>Discussion</b>	<b>Recommendations, Action/Follow-up; Responsible Person</b>
<b>TPIC Trauma Triage Quarterly Report</b>	Forrest mentioned that we talked about adding trend graphs by year and by quarter to the report. Dwight stated that the new version of the report that was sent out prior to the meeting has the trend data added to the report. Bryan mentioned that the data with vital signs reported and vital signs completed showed improvement. Lou Ann mentioned the summary table by year. Dwight explained that we don't have enough data by year to chart, but the numbers by year can be provided in a table. Forrest mentioned that increasing the complete vital sign data is the first step in getting more trauma patients to trauma centers. Forrest also mentioned that the next step would be about improving trauma triage.	
<b>Risk Adjusted Report for Hospitals /Linkage/TQIP</b>	Tim stated that we discussed with Cam and we were told to wait on this since there are developments behind the scenes in the works that may be a way to achieve this. There may be something in the works. Forrest reported that TQIP has not been willing to commit to reporting de-identified hospitals in a report. They will only report the data as an aggregate. Forrest is working on this issue.
